**American Socialist** Ryan C. McIlhenny, 2025-02-20 Ryan C. McIlhenny's *American Socialist* is the first comprehensive biography of Laurence Gronlund 1844-1899, one of the nation's most persuasive proponents of socialism. Gronlund cultivated a unique polemic against capitalism by advocating positions that synthesized Marxism with Darwinian evolution, rejected class violence, and emphasized cooperation over competition. According to McIlhenny, a belief in a divine force advancing history toward a cooperative commonwealth underpinned his philosophy. Gronlund's books enjoyed a wide and dogmatic readership during the late nineteenth century, and his teachings inspired prominent Gilded Age figures including Edward Bellamy, Leo Tolstoy, and Eugene V. Debs. *American Socialist* masterfully restores Gronlund to his place among the nation's most important political thinkers.

INTERNATIONAL STATUS Albania is a member of the United Nations. December 14, 1955. It is a member of other international organizations. It was a member of the League of Nations. Albania became independent on November 28, 1912, after centuries of Ottoman domination. Its existence was recognized internationally after the First Balkan War on July 28, 1913, and an international control commission drew up a constitution in 1914 providing for a monarchy with a National Assembly, most of whose members were elected by the people. Albania, although a neutral state, became involved in the First World War, after which, in January 1920, the Albanian chiefs drew up a new constitution providing for a monarchy. In 1925, Albania was proclaimed a republic, and a new constitution based on the United States constitution was promulgated. In 1928, the President became King, and a new constitution followed. On April 7, 1939, Italy occupied Albania and imposed a constitution providing that Albania was a monarchy under the House of Savoy. On April 6, 1941, martial law was proclaimed throughout the country. After the Italian capitulation in 1943, Albania was occupied by Germany. The Albanian Communist Party was founded in November 1941, and the bases of the communist regime were laid at the second national conference in July 1943 of the Movement for National Liberation created by the Party to unite and control all the forces opposing foreign occupation. This conference created Councils of National Liberation.

**The Ashgate Research Companion to Secession** Peter Radan, 2016-03-23 Secession is a detachment of a territory from an existing state with the aim of creating a new state on the detached territory. Secession is usually an outcome of the political mobilization of a population on the territory to be detached and as a political

phenomenon is a subject of study in the social sciences Its impact on inter state relations is a subject of study in international relations But secession is also subject to regulation both in the constitutional law of sovereign states and in international law Following a spate of secessions in the early 1990s legal scholars have proposed a variety of ways to regulate the international responses to attempts at secessions Moreover since the 1980s normative justification of secession has been subject to an intense debate among political theorists and moral philosophers This research companion has the following three complementary aims First to offer an overview of the current theoretical approaches to secession in the social sciences international relations legal theory political theory and applied ethics Second to outline the current practice of international recognition of secession and current domestic and international laws which regulate secession Third to offer an account of major secessionist movements past and present from a comparative perspective In their accounts of past secessions and current secessionist movements the contributors to this volume focus on the following four components the nature and source of secessionist grievances the ideologies and techniques of secessionist mobilization the responses of the host state or majority parties in the host state and the international response to attempts at secession This provides a basis for identification of at least some common patterns in the otherwise highly varied processes of secession

International Institutional Law Niels M. Blokker, 2025-03-24 This seventh revised edition of International Institutional Law covers the most recent developments in the field Although public international organizations such as the United Nations the World Trade Organization the World Health Organization the African Union ASEAN the European Union Mercosur NATO and OPEC have widely divergent objectives powers fields of activity and numbers of member states they also have many institutional characteristics in common There is unity within diversity Rather than being a handbook for specific organizations the book offers a comparative analysis of the institutional law of international organizations It includes chapters on the rules and practices concerning membership institutional structure decision making financing legal order supervision and sanctions legal status and external relations The book s theoretical framework and extensive use of examples from practice is designed to appeal to both academics and practitioners
