King, 2012-12-06 lE King Michael Kalecki 1899 1970 was one of the most important and also one of the most underrated economists of the twentieth century In the 1930s he made a series of fundamental contributions to macroeconomic theory which anticipated complemented and in some ways surpassed those of Keynes Almost entirely self educated in economics and influenced rul much by Marxism as by mainstream theory Kalecki very largely escaped the fatal embrace of pre Keynesian orthodoxy which blunted the thrust of the General Theory Many Post Keynesians in particular have found in his work the elements of a convincing alternative to what Joan Robinson Kalecki's greatest advocate in the English speaking world was scathingly to describe as bastard Keynesianism But Kalecki was never interested in theory for its own sake He approached economics from a practical perspective wrote extensively on applied and policy questions and in the mal decades of his life turned his attention increasingly to problems of economic development and the management of state socialist economies Handbook of Chinese Economics Zhuoyuan Zhang, 2023-06-30 This book reviews the development of Chinese economics since the reform and opening up associated with the history and experience of China's economic growth This book makes a systematic study of the direction of reform the method of reform the path of reform the main body of reform and the motive force of reform accumulates more experiences that can be used for reference for the exploration of new reforms to be opened and probes into the way of reform in the next period.
