Essential Difference James Blachowicz, 2012-08-02 Finalist for the 2015 John N Findlay Award in Metaphysics presented by the Metaphysical Society of America Is metaphysics possible This book argues that the greatest threat to its viability derives from a self destructive formalism If what is essential to the nature of physical entities are the properties they have in common as formalism holds the inevitable result will be a reductionist collapse leaving only being or physical matter or some other underlying ground In *Essential Difference* James Blachowicz first constructs a one to one historical parallel between the modern crisis surrounding formalism Hume Kant Hegel and the ancient version Parmenides Plato Aristotle focusing on the principles of differentiation and individuation that underlie Aristotle's and Hegel's antireductionist programs He then proposes a contemporary metaphysical theory of emergence in the context of recent philosophy of science This theory founded on the principle of the nonderivability of actual states from possible states holds that the differences among physical biological and mental phenomena are essential to any metaphysics *Essential Difference* is the only focused treatment of this problem and is itself essential for any understanding of the nature of metaphysics
