United States. National Bioethics Advisory Commission,1997 Landscapes and Labscapes Robert E. Kohler,2010-11-15

What is it like to do field biology in a world that exalts experiments and laboratories How have field biologists assimilated laboratory values and practices and crafted an exact quantitative science without losing their naturalist souls In *Landscapes and Labscapes* Robert E Kohler explores the people places and practices of field biology in the United States from the 1890s to the 1950s He takes readers into the fields and forests where field biologists learned to count and measure nature and to read the imperfect records of nature s experiments He shows how field researchers use nature s particularities to develop practices of place that achieve in nature what laboratory researchers can only do with simplified experiments Using historical frontiers as models Kohler shows how biologists created vigorous new border sciences of ecology and evolutionary biology **Trust Me, I'm a Scientist** Pervez Hoodbhoy,Daniel Glaser,Steven Shapin,2004 Why should we trust scientists

What happens to trust when scientists are seduced by politics religion money or glory Public trust in scientists may be waning is this simply a longterm shift or does it tell us something important about our societies and our world *The Human Embryo Research Debates* Ronald M. Green,2001-06-28 Research on the early human embryo has long been recognized as essential to progress in a host of biomedical areas from reproductive medicine to the treatment of pediatric cancers Now with the possibility of stem cell research and cell replacement therapies embryo research holds out the promise of cures for many serious disease conditions such as diabetes and Alzheimer s disease Despite its importance however human embryo research has met powerful opposition Drawing on his experience as a member of the NIH s Human Embryo Research Panel Green offers a first hand account of the embryo research debates In telling this story he periodically pauses to reflect on some of the leading philosophical challenges posed by embryo research and new interventions at the start of life Among the questions he examines are What is the impact of new biological information on our thinking about life s beginning May parents risk injuring a child in order to have it What role should religion play in shaping biomedical policy in a controversial

area like this This is a fascinating insider's account of one of the most important if unsuccessful recent efforts to come to terms with a controversial area of scientific research

Lesser Harms Sydney A. Halpern, 2006-08-01 Research physicians face intractable dilemmas when they consider introducing new medical procedures Innovations carry the promise of preventing or curing life threatening diseases but they can also lead to injury or even death How have clinical scientists made high stakes decisions about undertaking human tests of new medical treatments In Lesser Harms Sydney Halpern explores this issue as she examines vaccine trials in America during the early and mid twentieth century Today's scientists follow federal guidelines for research on human subjects developed during the 1960s and 1970s But long before these government regulations medical investigators observed informal rules when conducting human research They insisted that the dangers of natural disease should outweigh the risks of a medical intervention and they struggled to accurately assess the relative hazards Halpern explores this logic of risk in immunization controversies extending as far back as the eighteenth century Then focusing on the period between 1930 and 1960 she shows how research physicians and their sponsors debated the moral quandaries involved in moving vaccine use from the laboratory to the clinic This probing work vividly describes the efforts of clinical investigators to balance the benefits and dangers of untested vaccines to respond to popular sentiment about medical hazards and to strategically present risk laden research to sponsors and the public Concise and extremely well written A fascinating synthesis of sociology history and institutional theory Samuel C Blackman Journal of the American Medical Association

Media Technologies Tarleton Gillespie, Pablo J. Boczkowski, Kirsten A. Foot, 2014-01-24 Scholars from communication and media studies join those from science and technology studies to examine media technologies as complex sociomaterial phenomena In recent years scholarship around media technologies has finally shed the assumption that these technologies are separate from and powerfully determining of social life looking at them instead as produced by and embedded in distinct social cultural and political practices Communication and media scholars have increasingly taken theoretical perspectives originating in science and technology studies STS while some STS scholars interested in information technologies have

linked their research to media studies inquiries into the symbolic dimensions of these tools In this volume scholars from both fields come together to advance this view of media technologies as complex sociomaterial phenomena The contributors first address the relationship between materiality and mediation considering such topics as the lived realities of network infrastructure The contributors then highlight media technologies as always in motion held together through the minute unobserved work of many including efforts to keep these technologies alive Contributors Pablo J Boczkowski Geoffrey C Bowker Finn Brunton Gabriella Coleman Gregory J Downey Kirsten A Foot Tarleton Gillespie Steven J Jackson Christopher M Kelty Leah A Lievrouw Sonia Livingstone Ignacio Siles Jonathan Sterne Lucy Suchman Fred Turner     The Medical-Legal Aspects of Acute Care Medicine James E. **Embryo Politics** Thomas Banchoff, 2011-05-15 Since the first fertilization of a human egg in the laboratory in 1968 scientific and technological breakthroughs have raised ethical dilemmas and generated policy controversies on both sides of the Atlantic Embryo stem cell and cloning research have provoked impassioned political debate about their religious moral legal and practical implications National governments make rules that govern the creation destruction and use of embryos in the laboratory but they do so in profoundly different ways In *Embryo Politics* Thomas Banchoff provides a comprehensive overview of political struggles about embryo research during four decades in four countries the United States the United Kingdom Germany and France Banchoff's book the first of its kind demonstrates the impact of particular national histories and institutions on very different patterns of national governance Over time he argues partisan debate and religious secular polarization have come to overshadow ethical reflection and political deliberation on the moral status of the embryo and the promise of biomedical research Only by recovering a robust and public ethical debate will we be able to govern revolutionary life science technologies effectively and responsibly into the future Public Health Administration Lloyd Novick, Cynthia

Morrow, Glen Mays, 2008-03-03 Public health has undergone enormous change in recent years the growing epidemics of obesity and diabetes the events of September 11 2001 devastating natural disasters such as the 2004 tsunami and Hurricane Katrina and the threats of emerging infectious diseases have redefined the field making the role of the public health administrator more important than ever before With contributions from top leaders in areas ranging from workforce to community based prevention to emergency preparedness the second edition of *Public Health Administration Principles for Population Based Management* offers detailed comprehensive coverage of current relevant issues for new as well as seasoned public health administrators *Fostering Well-being as a UN Sustainable Development Goal* Gerard Magill, James Benedict, 2025-02-24 This edited book is a collection of essays based on presentations at the 8th conference in an annual endowed series held at Duquesne University USA The conference series addresses emerging concerns and pivotal problems about our planet's environment and ecology The contributions gathered here highlight the inter relation of topics and expertise connecting well being as a UN sustainable development goal with health bioengineering and the natural and social environment The book concludes with an ethical analysis of the multiple and overlapping challenges that require urgent

attention and long term resolution The book is written for scholars and students in a variety of disciplines and fields that deal with sustainability      Observing Bioethics Renee C. Fox, Judith P. Swazey, 2008-07-23 Based on original primary and extensive secondary source materials the book views bioethics as a complex phenomenon that is not only related to advances in modern biology medicine and biotechnology but also to the fundamental values and beliefs and larger moral and existential questions which American society has been collectively grappling in its courts legislatures and media Although they center their analysis on U S bioethics the authors also trace the field s international spread including case studies of bioethics in France and Pakistan two of the many societies in which it has developed While recognizing the intellectual moral and sociological importance of American bioethics they are critical of certain of its characteristics and concerned about their implications especially the problems of thinking socially culturally and internationally that have existed since bioethics inception the field s tenuous interdisciplinarity and the extent to which the culture wars on the larger American scene have recently penetrated it      **Thomas Nagel** Alan Thomas, 2015-01-28 In the first systematic study of the philosophy of Thomas Nagel Alan Thomas discusses Nagel s contrast between the subjective and the objective points of view throughout the various areas of his wide ranging philosophy Nagel s original and distinctive contrast between the subjective view and our aspiration to a view from nowhere within metaphysics structures the chapters of the book A new Humean in epistemology Nagel takes philosophical scepticism to be both irrefutable and yet to indicate a profound truth about our capacity for self transcendence The contrast between subjective and objective views is then considered in the case of the mind where consciousness proves to be the central aspect of mind that contemporary theorising fails to acknowledge adequately The second half of the book analyses Nagel s work on moral and political philosophy where he has been most deeply influential Topics covered include the contrast between agent relative and agent neutral reasons and values Nagel s distinctive version of a hybrid ethical theory his discussion of life s meaningfulness and finally his sceptical arguments about whether a liberal society can reconcile the conflicting moral demands of self and other
