As Europe becomes more integrated at the economic and political level attempts are being made to harmonize education policies as well. This volume offers an important contribution in that the authors examine for the first time the politics and practices of social anthropology education across Europe. This book provides a comprehensive study of biography to summarize the standard forms as well as a range of peripheral and expanded forms of auto biography. Discussion and analyses to be done at three levels namely ontology, typology, and writing. It is drawn from local and international theories in biography in addition to related disciplines in particular for those of the twentieth century and summarizing the experiences of the writing of classics in both Chinese and Western biographical history. Individualized Biography. Combining Individual and Structural Perspective Anna Mikulina, 2020-09-22

Seminar paper from the year 2020 in the subject Sociology Individual Groups Society grade 1-7 University of Frankfurt/Main language English abstract

Understanding factors, mechanisms, and processes of upward and downward mobility in different countries remains an important scientific task of sociology around the world. The dominant approach to social inequality analysis is the structural approach which places mobility in the context of social structures, ability to reproduce or overcome unequal opportunities. Yet despite prejudice to social mobility in scientific discourse, the reality of modern society emphasizes the role of personal decisions and individual turning points. The theory of individualization, which addresses individual and structural factors together while not contradicting them, has received a great resonance. According to this theory, the importance of structural factors and universal stratification characteristics that determine human life is increasingly weakening in the individual's biography. Stable economic growth, the advancement of the education and social security system, instability in labor markets, and increased flows of transnational migration have weakened class boundaries and increased the diversity of life opportunities and transitions, as well as the role of the individual in the creation of own biography and the importance of personal choices, forcing a reconsideration of approaches and methods in studies of social mobility. The integration of the individual into social mobility research is an important methodological task, whose solution is closely linked to the development of a life course.

approach to mobility This approach can be broadly defined as consolidating research on biographies and life stories of individuals families and generations using both quantitative and qualitative methods In the biographical approach a person's life is understood as a result of the reciprocal effects of structural forces and individual actions and can be defined as a series of milestones in life events defined by the social order at each one of which an individual chooses certain social roles and statuses Biographical choices depend also on individual habitus stable patterns of thinking perception and evaluation embedded in the body However the ideologically ambiguous concept of individualization suggests the disintegration of previously existing social forms and the increasing fragility of traditionally important parameters of industrial society such as class culture and self consciousness race and ethnicity gender roles and family

Individualism, Holism and the Central Dilemma of Sociological Theory Jiří Šubr,2019-05-13 This book examines individualism and holism the two interpretive perspectives that have divided sociological theory into two camps examines attempts to overcome this antinomy and sets out a new approach to resolving this dilemma via critical reconfigurationism

The Auto/biographical I Liz Stanley,1992 This feminist literary study discusses postmodern ideas about the self particularly about the way in which selves are constructed by biography and autobiography The author particularly examines the manner in which women write about themselves

C. Wright Mills and the Sociological Imagination John Scott,Ann Nilsen,2013-11-29 With renowned international contributors and expert contributions from a range of specialisms this book will appeal to academics students and researchers of sociology

George Herbert Mead Peter Hamilton,1992

The Art of Sociological Argument Graham Crow,2017-09-16 This book explores the ways in which sociological arguments are constructed and presented looking at what can be learned from the contrasting styles of sociologists working in different periods and theoretical traditions Fundamental debates in the discipline are addressed such as can sociology provide final answers and how far is detachment feasible or desirable Finally the book considers the practical significance which thinking about styles of argument has for all students of sociology

Biographical Life Course Research Ann Nilsen,2023-12-13 This open access book explores an approach that connects individual and societal processes throughout history and shifting trends in sociological perspectives influenced by C Wright Mills theories of time and temporality It traces its origins from American pragmatist thought and Chicago qualitative sociology in the early 20th century to the revival of biographical research in European and American sociology during the 1970s The book shows empirical studies from this vibrant research approach can bridge methodological gaps between qualitative and quantitative biographical studies applicable to various topics like class gender ethnicity and intergenerational dimensions

Teaching with Sociological Imagination in Higher and Further Education Christopher R. Matthews,Ursula Edgington,Alex Channon,2018-01-30 This book uses research and personal stories from university lecturers to explore pedagogical strategies that illuminate how students minds can be switched on in order to unlock their extraordinary potential It presents diverse ways to create inspiring learning environments in chapters written by

Rethinking Social Theory Roger Sibeon,2004-03-27 Identifies and explores unresolved controversies and ambiguities in present day sociological theorizing **The Routledge International Handbook on Narrative and Life History** Ivor Goodson,Ari Antikainen,Pat Sikes,Molly Andrews,2016-10-04 In recent decades there has been a substantial turn towards narrative and life history study The embrace of narrative and life history work has accompanied the move to postmodernism and post structuralism across a wide range of disciplines sociological studies gender studies cultural studies social history literary theory and most recently psychology Written by leading international scholars from the main contributing perspectives and disciplines The Routledge International Handbook on Narrative and Life History seeks to capture the range and scope as well as the considerable complexity of the field of narrative study and life history work by situating these fields of study within the historical and contemporary context Topics covered include The historical emergences of life history and narrative study Techniques for conducting life history and narrative study Identity and politics Generational history Social and psycho social approaches to narrative history With chapters from expert contributors this volume will prove a comprehensive and authoritative resource to students researchers and educators interested in narrative theory analysis and interpretation

Situating Children of Migrants across Borders and Origins Claudio Bolzman,Laura Bernardi,Jean-Marie Le Goff,2017-10-25 This open access wide ranging collation of papers examines a host of issues in studying second generation immigrants their life courses and their relations with older generations Tightly focused on methodological aspects both quantitative and qualitative the volume features the work of authors from numerous countries from differing disciplines and approaches A key addition in a corpus of literature which has until now been restricted to studying the childhood adolescence and youth of the children of immigrants the material includes analysis of longitudinal and transnational efforts to address challenges such as defining the population to be studied and the difficulties of follow up research that spans both time and geographic space In addition to perceptive reviews of extant literature chapters also detail work in surveying the children of immigrants in Europe the USA and elsewhere Authors address key questions such as the complexities of surveying each generation in families where parents have migrated and left children in their country of origin and the epistemological advances in methodology which now challenge assumptions based on the Westphalian nation state paradigm The book is in part an outgrowth of temporal factors immigrants children

are now reaching adulthood in more significant numbers but also reflects the added sophistication and sensitivity of social science surveys In linking theoretical and methodological factors it shows just how much the study of these second generations and their families can be enriched by evolving methodologies This book is open access under a CC BY license
