1954 to build the Atlas America's first ICBM Beginning with the story of the guided missiles that were created before and during World War II Gainor describes how the early Soviet and American rocket programs evolved over the course of the following decade He argues that the USAF was wrongly criticized for unduly delaying the start of its ICBM program endangering national security and causing America embarrassment when a Soviet ICBM successfully put Sputnik into orbit ahead of any American satellite Shedding fresh light on the roots of America's space program and the development of US strategic forces The Bomb and America's Missile Age uses evidence uncovered in the past few decades to set the creation of the Atlas ICBM in its true context not only in the America of the postwar years but also in comparison with the real story of the Soviet missiles that propelled the space race and the Cold War Aimed at readers interested in the history of the Cold War and of space exploration the book makes a major contribution to the history of rocket development and the nuclear age

Hearn, 2008-07-15 From its beginnings in 1907 as the Aeronautical Division of U S Armys Signal Corps which consisted of one officer and two enlisted men the United States Air Force has grown to become the foremost aerial armed force in the world Although they had to fly French and British planes as the fledgling army aeronautical bureaucracy failed to procure any combat worthy American aircraft which arguably did not exist American aviators performed valiantly in World War I with intrepid pilots of the such as Eddie Rickenbacker and Frank Luke leading the way Between the wars all of aviation commercial and military around the world grew by leaps and bounds as the numbers of aircraft in service and their capabilities tremendously increased Although the Army Air Corps as it was known at the time was no better prepared for World War II than the rest of the army it had developed a highly professional corps of experienced officers who would be able to take advantage of the latest American aircraft technology such as the B 17 Flying Fortress and the P 51 Mustang With the end of the war and the creation of an independent armed force in 1947 the United States Air Force leapt into the jet age with such icons as the F 86 Sabre and the remarkable B 52 Stratofortress which soldiers on today more than fifty years after going into service in 1955 and with the youngest of the 744 plane production run being forty years old having been built in 1962 Air Force covers the entire history of the U S Air Force and its development from its beginnings early in the last century to becoming the worlds largest most powerful and most versatile air combat force Special attention is paid to the air forces recent post Vietnam history and an entire chapter is devoted to Americas air force of the future
