

Exam question

Write a story with the title 'The English Exam'. You should use a variety of tenses and your story must be between 180 and 220 words.

The English Exam

Dimitri woke up at 7:00 a.m. He had been chatting with a friend on the computer until nearly midnight the previous night so he was feeling quite tired but also rather nervous because this was the day of an important English exam at school. Dimitri had been studying very hard for this exam for the previous two weeks so he thought he had a good chance of passing it.

While Dimitri was travelling to school on the bus, he remembered that he had forgotten to take his wallet with him so he didn't have any money to buy lunch. Just after this, his friend Lucas got on the bus.

'Can I borrow some money, Lucas?' asked Dimitri. 'Sure, no problem,' replied Lucas. 'Here you go.'

The two boys did the English exam. While they were having lunch, Dimitri asked Lucas if he thought the exam had been difficult. Lucas smiled and picked up the slice of chocolate cake that he was eating.

'It was so easy! It was a piece of cake!' said Lucas, smiling.

Story Engineering Larry Brooks, 2011-02-24 What makes a good story or a screenplay great The vast majority of writers begin the storytelling process with only a partial understanding where to begin Some labor their entire lives without ever learning that successful stories are as dependent upon good engineering as they are artistry But the truth is unless you are master of the form function and

criteria of successful storytelling sitting down and pounding out a first draft without planning is an ineffective way to begin Story Engineering starts with the criteria and the architecture of storytelling the engineering and design of a story and uses it as the basis for narrative The greatest potential of any story is found in the way six specific aspects of storytelling combine and empower each other on the page When rendered artfully they become a sum in excess of their parts You ll learn to wrap your head around the big pictures of storytelling at a professional level through a new approach that shows how to combine these six core competencies which include Four elemental competencies of concept character theme and story structure plot Two executional competencies of scene construction and writing voice The true magic of storytelling happens when these six core competencies work together in perfect harmony And the best part Anyone can do it The Writer, 1911 *Reading Empirical Research Studies* John R. Hayes, Richard E. Young, Michele L. Matchett, Maggie McCaffrey, Cynthia Cochran, 2020-10-07 For the most part those who teach writing and administer writing programs do not conduct research on writing Perhaps more significantly they do not often read the research done by others because effective reading of articles on empirical research requires special knowledge and abilities By and large those responsible for maintaining and improving writing instruction cannot without further training access work that could help them carry out their responsibilities more effectively This book is designed as a text in graduate programs that offer instruction in rhetoric and composition Its primary educational purposes are to provide models and critical methods designed to improve the reading of scientific discourse to provide models of effective research designs and projects appropriate to those learning to do empirical research in rhetoric Aiming to cultivate new attitudes toward empirical research this volume encourages an appreciation of the rhetorical tradition that informs the production and critical reading of empirical studies The book should also reinforce a slowly growing realization in English studies that empirical methods are not inherently alien to the humanities rather that methods extend the power of humanist researchers trying to solve the problems of their discipline
