to accommodate such time honored concepts as wisdom and spirituality one that understands aging as a matter not merely of getting old but of consciously growing old

**Narrative and Cognition in Literature and Science** Michael Sinding, Aura Heydenreich, Klaus Mecke, 2025-07-21 This volume explores cognitive perspectives on how science and narrative shape one another Narrative is a principle of cognition and cognition is fundamental to narrative This duality enables a deeper mapping of the feedback between story and the natural sciences Science as a culturally organized and systematic mode of knowing the world may seem opposed to narrative thinking Yet they are deeply interwoven Scientists tell many kinds of stories across genres and media In thought experiments lab experiments written arguments and histories and philosophies of fields they recount and interpret unfoldings of events at often uncanny scales from particle collisions to the evolution of life to cosmic expansion Science stories go beyond science Early science is entwined with myth religion and magic We still mythologize beneficent or evil geniuses the promises and perils of technology Teachers journalists politicians and lawyers all tell science stories for their own purposes Literary artists use scientific ideas and forms reimagining physical forces causality and time in storyworlds themes and figures This is the first cognition focused multi disciplinary analysis of these narrative science relations

Narrative Theory, Literature, and New Media Mari Hatavara, Matti Hyvärinen, Maria Mäkelä, Frans Mäyrä, 2015-06-19 Offering an interdisciplinary approach to narrative this book investigates storyworlds and minds in narratives across media from literature to digital games and reality TV from online sadomasochism to oral history databases and from horror to hallucinations It addresses two core questions of contemporary narrative theory inspired by recent cognitive scientific developments what kind of a construction is a storyworld and what kind of mental functioning can be embedded in it Minds and worlds become essential facets of making sense and interpreting narratives as the book asks how story internal minds relate to the mind external to the storyworld that is the mind processing the story With essays from social scientists literary scholars linguists and scholars from interactive media studies answering these topical questions the collection brings diverse disciplines into dialogue providing new openings for genuinely transdisciplinary narrative theory The wide ranging selection of materials analyzed in the book promotes knowledge on the latest forms of cultural and social meaning making through narrative necessary for navigating the contemporary mediatized cultural landscape The combination of theoretical reflection and empirical analysis makes this book an invaluable resource for scholars and advanced students in fields including literary studies social sciences art media and communication
