Strabismus Symposium Amsterdam September 34 1981:

Strabismus Symposium Amsterdam, September 3-4, 1981 A.Th.M. van Balen, W.A. Houtman, 2012-12-06 Held in Amsterdam The Netherlands September 3 4 1981 Seventh International Visual Field Symposium, Amsterdam, September 1986 E.L. Greve, A. Heijl, 2012-12-06 The Seventh International Visual Field Symposium organized by the International Perimetric Society was held in Amsterdam The Netherlands September 6 10 1986 In many respects it was an exciting and fruitful meeting The number of participants was greater than ever The number of papers was too great to accommodate all of them The quality of the papers reflects the continuously rising interest in perimetry in general and in automated perimetry in particular Last but not least the social programme was organized in the by now almost classical friendly enjoyable and humouristic style of the International Perimetric Society This created an atmosphere of openness and free exchange of information which was clearly also felt in the scientific sessions The scientific part was divided in seven sessions with 44 spoken papers and a separate poster session during which the 46 posters were discussed The major themes of the meeting were The influence of media disturbances on the visual field and Advances in perimetry in glaucoma with special emphasis on progression The session on media provided interesting information on how the visual field was effected by preretinal filters The authors either studied the influence of lens or corneal opacities or simulated opacities by special filters placed in front of the eye In two papers the effect of cataract was qualified by photography or stray light measurements **Ocular Circulation and Neovascularization** D. Benezra, N. Ryan, B.M. Glaser, R.P. Murphy, 2012-12-06 Neovascularization is a normal phase of tissue repair mechanism In the eye however sprouting of new vessels within avascular tissues and their great tendency to bleed have detrimental effects on vision Diabetic retinopathy corneal neovascularization age related macular degeneration retinal vein occlusion and retinopathy of prematurity are major causes of blindness In all uncontrolled proliferation of new vessels is the underlying pathological cause leading to the inexorable loss of vision Development of laser technologies and their wide use in ophthalmology have brought some hope for the treatment of these diseases However it became evident that direct closure of the new vessels and or ablation of large part of the tissue are not ideal solutions to the problem Recent advances in molecular biology and genetic engineering have fostered basic knowledge regarding the growth factors and intercellular messengers and their association with the proliferation of new blood vessels These latter findings sparked a renewed interest in Michaelson's X factor of ocular neovascularization and opened avenues for possible innovative therapeutic approaches Therefore the suggestion to organize an international gathering of clinicians and scientists interested in problems of ocular circulation and neovascularization was received with great enthusiasm Unanimously it was decided to dedicate the symposium to Professor I C Michaelson the innovative scientist the great clinician the indefatigable teacher and above all the wonderful human being The meeting was highlighted by the outstanding atmosphere of friendship and scientific exchanges This book mirrors the information delivered and includes a

selection of papers from the scientific program The organization of this meeting and the publication of the book would not have been possible without the harmonious team efforts made by the International Scientific and Local Committees I am thankful to the chairpersons of the various sessions for their time, keen interest and endeavor for the realization of a high scientific level I also deeply acknowledge the help and support of Arnall Patz, Bob Murphy, Bert Glaser, Robert Frank, Larry Hjelmeland, Gordon Klintworth, Neville Welsh, Charles Riva, Alec Garner, Desmond Archer, Ephraim Friedman, Myron Yanoff, Moshe Lahav, Willem Manschot, Hans Walther Larsen and Masanobu Uyama The powerful stimulus of Hanan Zauberman, Steve Ryan, Gabriel Coscas, Giselle Soubrane, Moshe Ivry, Yuval Yassur and Sue and Peter Ballen was most instrumental in the realization of these dreams As always I was fortunate to have the invaluable collaboration of my loyal assistants Evelyne Cohen, Genia Maftzir, Israel Barzel, Arie Zelikovitch and Judith Ben Ezra The smooth running of the meeting and timely editing of the book could not have been possible without the incalculable help and indefatigable typing and council of Judith Fisher, whose seconded me in selecting the papers and editing the book

Development of Electronic Aids for the Visually Impaired P.L. Emiliani, 1986-04-30 Proceedings of a Workshop on the Rehabilitation of the Visually Impaired held at the Institute for Research on Electromagnetic Waves of the National Research Council, Florence, Italy Sponsored by the CEC as advised by the Committee on Medical and Public Health Research *Colour Vision Deficiencies VIII* G.

Verriest, 2012-12-06 *Colour Vision Deficiencies VIII* brings together information on the latest trends in the following areas of research: Visual effects of intense lights, Effects of intoxications on colour vision, Ageing and vision, Methods of examination, Congenital defects, Acquired defects, Practical aspects, Physiological bases This volume is a natural follow up on Volumes VI and VII published in 1981 and 1983 respectively by Dr W Junk Publishers **Ultrasonography in Ophthalmology 11** J.M.
