## **Straits Of Power:**

**Straits of Power** Joe Buff, 2011-05-17 In his latest mission Commander Jeffrey Fuller will go head to head against his most dangerous adversary yet his own allies Jeffrey Fuller has a new mission use his cutting edge submarine Challenger to recover a German spy claiming to have key information about the Berlin Boer Axis information that could be crucial to winning the war Fuller will have to navigate his super silent sub through some of the most densely patrolled waters in Europe if he hopes to accomplish his mission But Fuller knows he can't trust the spy code named Zeno an expert in electronic and information warfare The man could be a double agent sent by the enemy to compromise Challenger And when they finally recover the mysterious spy he reveals that only by helping him infiltrate Israel can he hope to prevent an imminent Axis attack Fuller is caught in a terrible dilemma if the man is a double agent he could be dooming Israel but if he does nothing the country could fall to the German assault To go ahead with the plan would pitch Fuller against the best defences of his own allies placing his crew in danger and possibly shattering bonds between nations It is a battle that if fought Fuller will have to fight entirely on his own

**The Five Power Defence Arrangements** Ang Cheng Guan, 2025-03-04 Ang describes the development of the Five Power Defence Arrangements FPDA an important security regional arrangement from its inception to the present from the perspectives of the five FPDA allies The book recounts the establishment of the FPDA in 1971 from the Anglo Malaysian Defence Agreement and its development in the first 20 years to the end of the Cold War in 1990 Based on declassified archival documents and secondary literature it explores how the FDPA has evolved and adapted to provide different benefits to each of its partners after the Cold War Ang contextualises the FPDA within existing scholarship and offers a glimpse into possible future trajectories A valuable resource for scholars students researchers and professionals interested in international history defence and security

**Maritime Power and the Law of the Sea:** James Kraska, 2011-01-19 In Maritime Power and the Law of the Sea Expeditionary Operations in World Politics Commander James Kraska analyzes the evolving rules governing freedom of the seas and their impact on expeditionary operations in the littoral near shore coastal zone Coastal state practice and international law are developing in ways that restrict naval access to the littorals and associated coastal communities and inshore regions that have become the fulcrum of world geopolitics Consequently the ability of naval forces to project expeditionary power throughout semi enclosed seas exclusive economic zones EEZs and along the important sea shore interface is diminishing and as a result limiting strategic access and freedom of action where it is most needed Commander Kraska describes how control of the global commons coupled with new approaches to sea power and expeditionary force projection has given the United States and its allies the ability to assert overwhelming sea power to nearly any area of the globe But as the law of the sea gravitates away from a classic liberal order of the oceans naval forces are finding it more challenging to accomplish the spectrum of maritime missions in the coastal littorals including forward presence power projection deterrence humanitarian assistance and sea control The developing

legal order of the oceans fuses diplomacy strategy and international law to directly challenge unimpeded access to coastal areas with profound implications for American grand strategy and world politics *Soviet Military Power*, 1989

*Managing Great Power Politics* Kei Koga, 2022-08-31 This Open Access book explains ASEAN's strategic role in managing great power politics in East Asia. Constructing a theory of institutional strategy, this book argues that the regional security institutions in Southeast Asia (ASEAN and ASEAN-led institutions) have devised their own institutional strategies vis-à-vis the South China Sea and navigated the great power politics since the 1990s. ASEAN proliferated new security institutions in the 1990s and 2000s that assumed a different functionality, a different geopolitical scope, and thus a different institutional strategy. In so doing, ASEAN formed a strategic institutional web that nurtured a quasi-division of labor among the institutions to maintain relative stability in the South China Sea. Unlike the conventional analysis on ASEAN, this study disaggregates ASEAN as a collective regional actor into specific individual institutions: ASEAN Foreign Ministers Meeting, ASEAN Summit, ASEAN-China dialogues, ASEAN Regional Forum, East Asia Summit, and ASEAN Defense Ministers Meeting and ASEAN Defense Ministers Meeting Plus, and explains how each of these institutions has devised and/or shifted its institutional strategy to curb great powers' ambition in dominating the South China Sea while navigating great power competition. The book sheds light on the strategic potential and limitations of ASEAN and ASEAN-led security institutions, offers implications for the future role of ASEAN in the Indo-Pacific region, and provides an alternative understanding of the strategic utilities of regional security institutions. **Southeast Asia and the Rise of Chinese and Indian Naval Power** Sam Bateman, Joshua

Ho, 2014-06-03 This book examines the emerging maritime security scene in Southeast Asia. It considers highly topical implications for the region of possible strategic competition between China and India, the rising naval powers of Asia, with a possible naval arms race emerging between these countries, both with naval force development and operations. As part of its Look East policy, India has deployed naval units to the Pacific Ocean for port visits and exercises, both with East Asian navies and the US Navy, but India is also concerned about the possibility of the Chinese Navy operating in the Indian Ocean. Even as the US-India defence relationship continues to deepen, the US and China are struggling to build closer links. China's and India's strategic interests overlap in this region, both in maritime strategic competition or conflict, which might be played out in the Bay of Bengal, the Malacca and Singapore Straits, and the South China Sea. The sea lines of communication (SLOCs) through Southeast Asian waters constitute vital choke points between the Indian and Pacific Oceans, carrying essential energy supplies for China and other Northeast Asian countries. Any strategic competition between China and India has implications for other major maritime players in the Pacific and Indian Oceans, especially Australia, the Republic of Korea, and Japan, as well as the US. This book identifies possible cooperative and confidence-building measures that may contribute to enhanced relations between these two major powers and dampen down the risks associated with their strategic competition.

Asian Maritime Power in the 21st Century Vijay Sakhuja, 2011 Maritime power has been a key defining parameter of

economic vitality and geostrategic power of nations This book explores how the first decade of the 21st century has witnessed the rise of China and India as confident economic powers pivoting on high growth rates exponential expansion of science technology and industrial growth      The Evolving Maritime Balance of Power in the Asia-Pacific Lawrence W. Prabhakar, Joshua Ho, Walter Samuel Grono Bateman, 2006 The Asia Pacific region has emerged as the hub of global geo political geo economic and geo strategic significance in the post Cold War period The rise of China and the resurgence of India will be the hallmark for the next 50 years How this surge in power is accommodated by the incumbent powers like the United States and Japan and how the new regional powers like China and India manage the power politics that emerge will be the key determinants of regional stability This volume examines the national maritime doctrines as well as the nuclear weapons developments at sea of the four major powers in the Asia Pacific namely China India Japan and the United States to see if the evolving dynamic is a cooperative or a competitive one In particular the volume looks at the evolving paradigms of maritime transformation in strategy and technology the emergent new maritime doctrines and evolving force postures in the naval orders of battle the role and operations of nuclear navies in the Asia Pacific and the implications and impact of nuclear weapons ballistic missiles and sea based missile defence responses in the region      **Crucible of Power** Howard Jones, 2009 Employing a narrative approach that uncovers the tangled and often confusing nature of foreign affairs Crucible of Power focuses on the personalities security interests and post war Cold War tendencies behind the formulation and implementation of U S foreign policy since 1945 The book includes updated coverage of the Bush administration s foreign policy with particular emphasis on the Middle East Selections from key foreign policy documents appear in each chapter

**Knowledge, Culture And Power** Anthony R. Welch, Peter Freebody, 2005-08-04 First published in 1992 Routledge is an imprint of Taylor Francis an informa company      **The Making of a Maritime Power** Zhiguo Kong, 2016-10-25 This book is a valuable work of reference for the study of sea power especially in China It analyzes the challenges and problems facing China s sea power and offers a complete set of solutions known as sea exploitation In this context it discusses five aspects of China s sea power 1 It revises the notion of sea power and proposes a cost benefit analysis framework for it It holds that sea power is undergoing major changes that multivariate completion and peaceful competition have become mainstream that negative and zero sum games have become positive sum games and that the pursuit of control over the sea has gradually developed into efforts to establish dominance in a partnership 2 By analyzing the increase in the benefits of China s sea power the rise in the nation s ability to pay principle and the growth in the public expectation of China s capability of providing global public goods it points out that the rise of China s sea power is an unavoidable trend 3 It explores the challenges and problems facing China s sea power arguing that China is currently in a situation where it is daunted by large countries troubled by small countries and its neighbors are expanding their armaments which have combined to increase the cost of improving China s sea power Meanwhile factors such as strategy vacuum poor oceanic management and polices

tending to restrict ocean development have substantially undermined the benefits of China's sea power 4 It summarizes features of China's sea power and stresses that dilemmas of non sovereign sea power expansion and sovereign sea power expansion traumatic pressure and transcendental ideals escalated conflict and peaceful appeal etc require China to articulate its stance on sea power on the one hand and possess the wisdom to resolve sea power problems peacefully on the other 5 It proposes that China should draw on the experience of the Western Han Dynasty of ancient China which adopted a land exploitation strategy and introduced a sea exploitation strategy offering a unique way to implement sea exploitation strategies in China based on domestic and foreign practices

*Sea Power and the Asia-Pacific* Geoffrey Till, Patrick Bratton, 2012-02-07 With particular focus on the Asia Pacific region this book examines the rise and fall of sea powers In the Asia Pacific region there has been significant expansion of sea based economies together with burgeoning naval power Many claim that these processes will transform the world's future economic and security relationships The book addresses the question of to what extent the notion of Asia rising is reflected by and dependent on its developing sea power A central theme is the Chinese challenge to long term Western maritime ascendancy and what might be the consequences of this In order to situate current and future developments this book includes chapters which analyse what sea power means and has meant as well as its role both historic and contemporary in the rise and fall of great powers This book will be of much interest to students of naval power Asian politics strategic studies war and conflict studies IR and security studies

**Power Transition and International Order in Asia** Peter Shearman, 2013-09-23 This edited volume examines how the transition and diffusion of power in global politics is impacting on stability and order in Asia Both in the academic field of International Relations IR and among policymakers the big question today concerns the rise of China the relative decline of the United States and the increasing importance of Asia in global politics The level of impact the international power transition will have in the region remains unclear but observers agree that Asia is a potential tinderbox for crises and conflict This volume brings together leading scholars from around the world to assess current thinking in IR on these issues The authors apply appropriate theories and methods of analysis in their specific area of expertise to examine the likely effects of the changing global power distribution on Asia There is also said to be an ongoing diffusion of power away from states to non state actors in the region hence in addition to examining changing relations between the Great Powers the book will also assess the implications that other actors from terrorist groups insurgents and organised crime syndicates could have on stability and order This book will be of much interest to students of Asian politics security studies diplomacy and international relations

*International Law, US Power* Shirley V. Scott, 2012-03-22 Shirley Scott explains how the USA has benefited from continuity in its strategic engagement with international law

**"Indian Industries and Power," Incorporating "Indian Motor News" ...**, 1914 *Progressive Age*, 1907

**Awkward Powers: Escaping Traditional Great and Middle Power Theory** Gabriele Abbondanza, Thomas Stow Wilkins, 2021-10-04 This book introduces the editors new concept of Awkward

Powers By undertaking a critical re examination of the state of International Relations theorising on the changing nature of the global power hierarchy it draws attention to a number of countries that fit awkwardly into existing but outdated categories such as great power and middle power It argues that conceptual categories pertaining to the apex of the international hierarchy have become increasingly unsatisfactory and that new approaches focusing on such Awkward Powers can both rectify shortcomings on power theorising whilst shining a much needed theoretical spotlight on significant but understudied states The book s contributors examine a broad range of empirical case studies including both established and rising powers across a global scale to illustrate our conceptual claims Through such a novel process we argue that a better appreciation of the de facto international power hierarchy in the 21st century can be achieved *Power through Geography: The Foundations of Geopolitics and World Politics* Boreas M.L. Saage, Power through Geography offers a comprehensive analysis of how geographical factors fundamentally shape global power dynamics and international relations This detailed examination explores the intricate relationship between physical space and political influence in the modern world system The book methodically unpacks how Political Geography serves as the foundation for understanding complex geopolitical realities from resource distribution to territorial conflicts Readers will gain insight into how mountains rivers coastlines and climate patterns create strategic advantages or vulnerabilities that directly impact a nation s position in World Politics Divided into five substantive sections the work begins by establishing the theoretical foundations of Geopolitics examining how geographical factors function as power resources and tracing the historical evolution of geopolitical thinking The analysis then expands to explore the spatial dimensions of global politics including continental power blocs maritime control and border regions as flashpoints of tension Particularly relevant to contemporary debates the book dedicates significant attention to the Politics of Isolationism contrasting isolationist strategies with expansionist approaches and multilateral frameworks This section provides valuable context for understanding current nationalist movements and their geographical underpinnings The critical role of resources in geopolitical calculations receives thorough treatment with focused analysis of energy security water politics and agricultural land as sources of power and conflict The book concludes with practical recommendations for policymakers strategists and analysts seeking to navigate an increasingly complex geopolitical landscape Rich with data visualizations including charts on resource distribution defensive topography and conflict patterns this work provides both theoretical depth and empirical evidence to support its analysis of how geography continues to shape the fundamental power structures of our interconnected world **Projections of Power** Anne L. Foster, 2010-07-30

Examines how the presence of the United States as a colonial power in Southeast Asia was perceived by Americans and how it influenced Southeast Asians and European imperial powers in the region **Means of Measuring Naval Power with Special Reference to U.S> and Soviet Activities in the Indian Ocean, Prepared for the Subcommittee on the Near East and South Asia Of..., 93-2, May 12, 1974** United States. Congress. House. Foreign Affairs, 1974
