Stranger From Nowhere:

Theories of the Stranger Vince Marotta, 2016-09-13 In our global multicultural world how we understand and relate to those who are different from us has become central to the politics of immigration in western societies Who we are and how we perceive ourselves is closely associated with those who are different and strange This book explores the pivotal role played by the stranger in social theory examining the different conceptualisations of the stranger found in the social sciences and shedding light on the ways in which these discourses can contribute to an analysis of cross cultural interaction and cultural hybridity Engaging with the work of Simmel Park and Bauman and arguing for the need for greater theoretical clarity Theories of the Stranger connects conceptual questions with debates surrounding identity politics multiculturalism online ethnicities and cross cultural dialogue As such this rigorous conceptual re examination of the stranger will appeal to scholars across the social sciences with interests in social theory and the theoretical foundations of discourses relating to migration cosmopolitanism globalisation and multiculturalism

Stranger's Knowledge Xavier Marquez, 2012-06-07 The Statesman is a difficult and puzzling Platonic dialogue In A Stranger's Knowledge Marquez argues that Plato abandons here the classic idea prominent in the Republic that the philosopher qua philosopher is qualified to rule Instead the dialogue presents the statesman as different from the philosopher the possessor of a specialist expertise that cannot be reduced to philosophy The expertise is of how to make a city resilient against internal and external conflict in light of the imperfect sociality of human beings and the poverty of their reason This expertise however cannot be produced on demand one cannot train statesmen like one might train carpenters Worse it cannot be made acceptable to the citizens or operate in ways that are not deeply destructive to the city's stability Even as the political community requires his knowledge for its preservation the genuine statesman must remain a stranger to the city Marquez shows how this impasse is the key to understanding the ambiguous reevaluation of the rule of law that is the most striking feature of the political philosophy of the Statesman The law appears here as a mere approximation of the expertise of the inevitably absent statesman dim images and static snapshots of the clear and dynamic expertise required to steer the ship of state across the storms of the political world Yet such laws even when they are not created by genuine statesmen can often provide the city with a limited form of cognitive capital that enables it to preserve itself in the long run so long as citizens and especially leaders retain a philosophical attitude towards them It is only when rulers know that they do not know better than the laws what is just or good and yet want to know what is just and good that the city can be preserved The dialogue is thus in a sense the vindication of the philosopher king in the absence of genuine political knowledge

Romanticism and the Question of the Stranger David Simpson, 2024-05-31 In our post 9 11 world the figure of the stranger the foreigner the enemy the unknown visitor carries a particular urgency and the force of language used to describe those who are different has become particularly strong But arguments about the stranger are not unique to our time In Romanticism and the Question of the Stranger David Simpson

locates the figure of the stranger and the rhetoric of strangeness in romanticism and places them in a tradition that extends from antiquity to today Simpson shows that debates about strangers loomed large in the French Republic of the 1790s resulting in heated discourse that weighed who was to be welcomed and who was to be proscribed as dangerous Placing this debate in the context of classical biblical and other later writings he identifies a persistent difficulty in controlling the play between the despised and the desired He examines the stranger as found in the works of Coleridge Austen Scott and Southey as well as in depictions of the betrayals of hospitality in the literature of slavery and exploration as in Mungo Park's Travels and Stedman's Narrative and portrayals of strange women in de Staël Rousseau and Burney Contributing to a rich strain of thinking about the stranger that includes interventions by Ricoeur and Derrida Romanticism and the Question of the Stranger reveals the complex history of encounters with alien figures and our continued struggles with romantic concerns about the unknown

Contestatory Cosmopolitanism Tom Bailey, 2018-10-11 Contemporary global politics poses urgent challenges from humanitarian migratory and environmental problems to economic religious and military conflicts that strain not only existing political systems and resources but also the frameworks and concepts of political thinking The standard cosmopolitan response is to invoke a sense of global community governed by such principles as human rights or humanitarianism free or fair trade global equality multiculturalism or extra national democracy Yet the contours grounds and implications of such a global community remain notoriously controversial and it risks abstracting precisely from the particular and conflictual character of the challenges which global politics poses The contributions to this collection undertake to develop a more fruitful cosmopolitan response to global political challenges one that roots cosmopolitanism in the particularity and conflict of global politics itself They argue that this contestatory cosmopolitanism must be dialectical agonistic and democratic that is its concepts and principles must be developed immanently and critically out of prevailing normative resources they must reflect and acknowledge their antagonistic roots and they must be the result of participatory and self determining publics In elaborating this alternative the contributions also return to neglected cosmopolitan theorists like Hegel Adorno Arendt Camus Derrida and Mouffe and reconsider mainstream figures such as Kant and Habermas This collection was originally published as a special edition of *Critical Horizons*
