

# Sustainability growth strategy for planet and profits

Tomorrow

## Within the organisation

- Stage one: Pollution prevention
- Where are the most significant waste and emission streams from our current operations? Can we lower costs and risks by eliminating waste at the source or by using it as useful input?

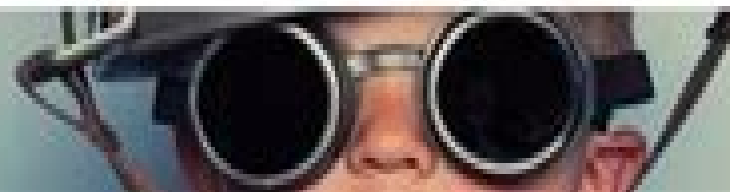

## Outside the organisation

- Stage two: Product stewardship
- What are the implications for product design and development if we assume responsibility for a product's entire life cycle? Can we add value or lower costs while simultaneously reducing the impact of our products?

Today

- Stage three: Clean technology
- Is the environmental performance of our products limited by our existing competency base? Is there potential to realise major improvements through new technology?

- Stage four: Sustainability vision
- Does our corporate vision direct us towards the solution of social and environmental problems? Does our vision guide the development of new technologies, markets, products and processes?
