Ashby, Tony Evans, NA Fleck, J.W. Hutchinson, H.N.G. Wadley, L. J. Gibson, 2000-07-30 Metal foams are at the forefront of technological development for the automotive aerospace and other weight dependent industries They are formed by various methods but the key facet of their manufacture is the inclusion of air or other gaseous pockets in the metal structure The fact that gas pockets are present in their structure provides an obvious weight advantage over traditionally cast or machined solid metal components The unique structure of metal foams also opens up more opportunities to improve on more complex methods of producing parts with space inclusions such as sand casting This guide provides information on the advantages metal foams possess and the applications for which they may prove suitable Offers a concise description of metal foams their manufacture and their advantages in industry Provides engineers with answers to pertinent questions surrounding metal foams Satisfies a major need in the market for information on the properties performance and applications of these materials Engineering Plasticity and Its Applications from Nanoscale to Macroscale Hoon Huh, 2009 The primary objective of the Asia Pacific Conference on Engineering Plasticity and Its Applications AEPA is to provide a free forum for exchanging ideas and introducing the latest research findings in the field of engineering plasticity This conference is unique among the related conferences in that it provides a forum for all fields of plasticity so that multi disciplinary research works are encouraged This proceedings volume consists of papers presented at AEPA2008 and covers the following categories in all fields of engineering plasticity constitutive modeling damage fracture fatigue and failure dynamic loading and crash dynamics engineering applications and case studies experimental and numerical techniques molecular dynamics nano meso micro and crystal plasticity phase transformations plastic instability and strain localization plasticity in advanced materials plasticity in materials processing technology plasticity in tribology porous cellular and composite materials structural
