CHEMRAWN I is a collection of lectures presented at the World Conference on Future Sources of Organic Raw Materials
held in Toronto Canada on July 10 13 1978 The conference focused on potential future sources of organic raw materials such
as non conventional fossil hydrocarbons coal industrial and agricultural wastes and renewable resources like wood and other
plant materials This book is comprised of 52 chapters and opens with an assessment of the likely future availability of
conventional oil and gas as they relate to possible demands for petrochemical feedstocks paying particular attention to the
availability and demand patterns for fossil hydrocarbons The following chapters discuss the reserves and worldwide
distribution of oil shale and tar sands climate and its impact on renewable resources research and management of natural
resources and production of chemicals directly from synthesis gas Pyrolysis of solid carbonaceous materials is also
considered along with natural rubber production and biomass for non food use This monograph will be a useful resource for
organic chemists and energy policymakers
