Wachs, Robert Sheehan, 2013-06-29 Our knowledge of the cognitive and social emotional functioning of developmentally disabled infants and preschoolers derives in large part from our assessment of such children This book has been developed to familiarize readers with the characteristics of developmentally disabled children and to introduce to readers aspects of measurement that are of relevance to the assessment of atypical infants and preschoolers The book has been developed with clinicians and prospective clinicians in mind These are individuals who are committed to the care and education of developmentally disabled infants and preschoolers and the families of those children The book has thus been written to provide support for the use of assessment data in planning early intervention programs Of special note in the development of this edited book is that it is divided into four major parts with interrelated chapters in each part The authors of chapters in Parts II and III had access to the chapters in Part I before writing their chapters The summary chapters found in Part IV were similarly written by authors having access to all chapters in Parts I III This approach to the development of an edited book was chosen as a way of ensuring an integration of major concepts throughout the book This process is also a reflection of our belief that assessment is an interdisciplinary process involving the synthesis of a number of diverse interests Childhood Disability and Family Systems Michael Ferrari, Marvin B. Sussman, 2016-01-08 First published in 1987 this book focuses on childhood disability within the family It examines the very nature of disability itself as well as many of the fundamental elements of families The book was written at a time when the meaning level of disability and its effect on family and society were rapidly changing and people with disabilities were starting to benefit from opportunities to compensate for whatever disabilities they may have had Modern technology and an affluent society afforded advantages to support many of its disabled members Contributors examine the contemporary context of disability the cost of disability to families ethical philosophical and social

issues underlying the treatment and rehabilitation of children with severe disabilities and the role of professionals amongst other topics This book will be of interest to those involved in teaching research and direct care with families who have children with disabilities Although written in the late 80s the work discusses subjects that are still vital today
