Taenia Solium Cysticercosis From Basic To Clinical Science:

Taenia Solium Cysticercosis Gagandeep Singh, Sudesh Prabhakar, 2002 Taenia solium cysticercosis is a parasitic disease caused by the dissemination of the larval form of the pork tapeworm and affects an estimated 50 million people worldwide. It is endemic in several developing countries including many in Central and South America, Africa and South Asia. Through increased immigration and international travel, it is also of emerging significance in developed countries such as the USA. This book, written by international leading experts in the field, covers the basic science and clinical aspects of Taenia solium, its pathology, investigational aspects of neurocysticercosis, and therapy and prevention. **Clinical MR**

Neuroimaging Jonathan H. Gillard, Adam D. Waldman, Peter B. Barker, 2009-11-26 Clinical MR Neuroimaging, second edition, provides radiologists, neuroscientists, and researchers with a clear understanding of each physiological MR methodology and their applications to the major neurological diseases. Section 1 describes the physical principles underlying each technique and their associated artefacts and pitfalls. Subsequent sections review the application of MRI in a range of clinical disorders: cerebrovascular disease, neoplasia, infection, inflammation, demyelination disorders, seizures, psychiatric, neurodegenerative conditions, and trauma. This new edition includes all recent advances and applications with greatly increased coverage of permeability imaging, susceptibility imaging, iron imaging, MR spectroscopy, and fMRI. All illustrations are completely new, taking advantage of the latest scan capabilities to give images of the highest possible quality. In addition, over 35 new case studies have been included. Editors and contributors are the leading neuroimaging experts worldwide; their unique combination of technical knowledge and clinical expertise makes Clinical MR Neuroimaging the leading text on the subject.
