Templets And The Explanation Of Complex Patterns:

Templets and the Explanation of Complex Patterns Michael J. Katz, 1986 Where does the particular form or configuration of a pattern come from and how is it propagated from pattern to pattern Templets and the Explanation of Complex Patterns provides a natural language for analysing such questions Using it the organisational forces that underlie the fabrication of any pattern can be divided into two classes First there are the universal laws of pattern assembly the configurational rules and constraints inherent within the fabric of the pattern elements themselves Second there are the templets external situational constraints imposed on the pattern elements From the perspective of templing simple patterns can be directly contrasted with complex patterns the former are completely determined by their universal laws whereas the latter also require extensive templets Natural patterns range along the entire spectrum from simple to complex and the most complex of these include both random patterns and many biological patterns

The Lie and the Light James Ellsberry, 2019-04-01 *The Lie and the Light* examines six lies that have misled many to reject the truth claims of God in favor of the false promises and lies of this world Our nation was conceived by people who risked their lives and fortunes to establish Christianity in a new world They believed the Holy Bible is the source of all truth The men who authored the Constitution of the United States were Christians and God s Word is the standard by which all things were measured Did that make them perfect Of course not Corruptible Hypocritical No more or less than we The point is they agreed on the direction of the country The standard they used is incorruptible We have strayed from that standard and that has become a problem To get to the root cause of the bitterness violence and unforgiving tone that grips America we must acknowledge that our growing disbelief seeing God as irrelevant gives license to sinful behavior and hateful attitudes If there are no sacred moral or ethical standards no consequences enforced for violating the law then chaos reigns If all beliefs are equally valid the law of the jungle will prevail The worldview of those putting their faith in the authority of humankind severely opposes the worldview of those faithfully placing their trust in the universal
