repeatedly transformed through symbol formation on the basis of the internal relationship between the infant self and its object and the aesthetic containment provided by this counter transference dream as Meltzer put it enables the mind to digest its conflicts and develop This search for a pattern that can make contrary emotions thinkable is modelled by all art forms and accounts for their universal significance It is a process that can be observed particularly clearly in literature in the form of the romance between the poet and his Muse the traditional formulation of the psycho analytic internal object
