Lane, 2011 Reading and Understanding the Gospels Who Jesus Is What He Teaches and the Beginning of Christianity This is

the second volume of a three volume series written for anyone who is interested in acquiring basic knowledge and understanding of the Bible the book that is the foundation of Western and Middle Eastern civilizations The first volume is titled Reading and Understanding the Old Testament The Foundation of Judaism Christianity and Islam The last volume will be Reading and Understanding the Acts of the Apostles the New Testament Letters and the Beginning of the Church This second volume like the others uses scholarship in a practical manner moving chapter by chapter through each Gospel using the actual verses as it explains clearly their basic meaning for people in ancient time and our time today The readers will experience and get a complete sense of the content and meaning of Matthew Mark Luke and John the Gospels that Christians call inspired writings Like the first volume on the Old Testament the author integrates the historical and the literary with the theological in order to highlight the meaning of each Gospel Once again the author has taken a difficult subject made it easy reading and filled it with challenging insights This book is strongly recommended not just for Christians but for those who are interested in knowing what the first Christians said about Jesus what he taught and how Christianity began Rural Young Women, Education, and Socio-Spatial Mobility Wendy Geller, 2015-10-08 Much of the literature on globalization has centered on the large macro level forces that influence the ways ideas people and various forms of capital move around the world From this vantage point discussions about the progressive feminization of migration in particular the feminization of out migration from rural areas indicate an intriguing trend Simultaneously the local experience of global forces is an important way of exploring how macro level processes are navigated by social actors on the ground This provides added texture to our understanding of why and how people make decisions about their lives within an increasingly interconnected social economic and political environment This volume explores whether concurrent patterns in identity development social relations and youth behaviors on the micro level might help explain similarities observable at the macro level Through a triangulated approach that balances between statistical backdrops extant quantitative research and in depth qualitative interviews this book theorizes about shifts in gender normativity efforts towards social mobility and the possible effects of an increasingly globalized society To do this it examines the decision making processes employed by high achieving young women from rural areas in Vermont and Leinster Ireland as they figured out who they wanted to become as adults and where they wanted to be those people Remaining mindful of structural constraints and using the lens of the psychic landscape Reay 2005 to view class as a reflexive practice this book peers into the ways certain types of identity evident among blue collar students seem to be carving out some potential for social and spatial mobility amidst both global and local trends **The Top Ten Diseases of All Time** Stacey Smith?, 2023-10-24 Infectious diseases have been with us for millennia and continue to pose a threat from the irritation of flu season to the potential extinction of our species We instinctively fear them and alter our behaviour as a result The reason we bury bodies six feet deep is because that was the depth that stopped plague transmission from the dead in the Middle Ages Many religious practices such as avoiding certain meats were established

because of foodborne disease transmission In *The Top Ten Diseases of All Time* Stacey Smith presents the top ten deadliest diseases and their effects on society providing a wealth of information about the trajectory and terrible impact of each disease and humanity's reaction to these diseases throughout the millennia Did you know for example that The medical symbol evolved from the worms wrapped around a stick because that was the only way to remove Guinea worms from the body so having a stick meant you were a doctor Smallpox is the third worst disease ever yet it remains the only successfully eradicated human disease but not for long thanks in part to a successful vaccine in part to photographic recognition cards and in part due to helicopter led forced vaccinations of whole villages in the former Yugoslavia This brings up issues of individual rights versus public good that remain relevant today Four diseases were targeted for eradication in the 20th century the failure to do so led directly to the creation of the environmental movement The inability of priests to explain how to stop the plague in the Middle Ages broke the back of the church as an all powerful and all knowing institution and led to colonialism and slavery *The Top Ten Diseases of All Time* offers a fascinating overview of the deadliest diseases to spread throughout the world including HIV AIDS Spanish Flu Measles The Black Death Smallpox and others

The Hope of Liberation in World Religions Miguel A. De La Torre, 2008 Liberation theology emphasizes the Christian mission to bring justice to the poor and oppressed As a part of Christian theology liberation theology has been most frequently associated with the Catholic Church in Latin America This groundbreaking work seeks to identify how the theological concepts of liberation theology might be manifested within other world faith traditions This is thus the first book that attempts to find a common ground for liberation theology across religions All of the contributors are scholars who share the religion or belief system they describe Throughout they endeavor to articulate liberationist concepts from the perspective of those who have been marginalized

Globalization of Unequal National Economies David John Farmer, 2005 *To Kill the King* sketches post traditional consciousness in terms of three concepts thinking as play justice as seeking and practice as art In a series of critical essays on each of these concepts the book describes a post traditional consciousness of governance that can yield improvement in the quality of life for each individual

Ten Lessons for a Post-Pandemic World Fareed Zakaria, 2020-10-06 New York Times Bestseller COVID 19 is speeding up history but how What is the shape of the world to come Lenin once said There are decades when nothing happens and weeks when decades happen This is one of those times when history has sped up CNN host and best selling author Fareed Zakaria helps readers to understand the nature of a post pandemic world the political social technological and economic consequences that may take years to unfold Written in the form of ten lessons covering topics from natural and biological risks to the rise of digital life to an emerging bipolar world order Zakaria helps readers to begin thinking beyond the immediate effects of COVID 19 *Ten Lessons for a Post Pandemic World* speaks to past present and future and while urgent and timely is sure to become an enduring reflection on life in the early twenty first century
