Lofland, 2019-04-23 The fortieth anniversary edition of a classic and prescient work on death and dying Much of today's literature on end of life issues overlooks the importance of 1970s social movements in shaping our understanding of death dying and the dead body This anniversary edition of Lyn Lofland's *The Craft of Dying* begins to repair this omission Lofland identifies critiques and theorizes 1970s death movements including the Death Acceptance Movement the Death with Dignity Movement and the Natural Death movement All these groups attempted to transform death into a positive experience anticipating much of today's death and dying activism Lofland turns a sociologist's eye on the era's increased interest in death considering among other things the components of the modern face of death and the craft of dying the construction of a dying role or identity by those who are dying and the constraints on their freedom to do this Lofland wrote just before the AIDS epidemic transformed the landscape of death and dying in the West many of the trends she identified became the building blocks of AIDS activism in the 1980s and 1990s *The Craft of Dying* will help readers understand contemporary death social movements historical relationships to questions of race class gender and sexuality and is a book that everyone interested in end of life politics should read **The Workforce Engagement Equation** Jamison J. Speaking for the Dying Susan P. Shapiro, 2019-06-12 Seven in ten Americans over the age of age of sixty who require medical decisions in the final days of their life lack the capacity to make them For many of us our biggest life and death decisions literally will therefore be made by someone else They will decide whether we live or die between long life and quality of life whether we receive heroic interventions in our final hours and whether we die in a hospital or at home They will determine whether our wishes are honored and choose between fidelity to our interests and what is best for themselves or others Yet despite their critical role we know remarkably little about how our loved ones decide for us *Speaking for the Dying* tells their story drawing on daily observations over more than two years in two intensive care units in a diverse urban hospital From bed-sides hallways and conference rooms you will hear in their own words how physicians really talk to families and how they respond You will see how decision makers are selected the interventions they weigh in on the information they seek and evaluate the values and memories they draw on the criteria they weigh the outcomes they choose the conflicts they become embroiled in and the challenges they face Observations also provide insight into why some decision makers authorize one aggressive intervention after the next while others do not even on behalf of patients with similar problems and prospects And they expose the limited role of advance directives in structuring the process decision makers follow or the outcomes that result Research has consistently found that choosing life or death for another is one of the most difficult decisions anyone can face sometimes haunting families for decades This book shines a bright light on a role few of us will escape and offers steps that patients and loved ones health care providers lawyers and policymakers could undertake before it is too late

Family Re-union Robert Kuttner, Sharland Trotter, 2002 In this relevant new book a journalist husband and his psychologist wife offer wise and inspiring advice to middle aged adults on how to have more meaningful relationships with their adult children and elderly parents

The Aging Family Terry Hargrave, Suzanne Midori Hanna, 2013-06-17 As the population of the United States ages and the lifespan increases so does the number of living generations The mental health care delivery system

therefore faces new challenges The United States is heading into the 21st century with multigenerational families now commonplace with up to four or five generations co existing at the same time And each generation is forced to deal with its own developmental transitions as well as complex cross generational issues When a therapist steps into this situation his or her role has to take on board the complexity of the whole family system This text highlights the issues that hold families together and often tear them apart It offers core perspectives that seek to make the work of intervention easier and more effective for the clinician Whether the therapist is called upon to intervene on behalf of elder members to deal with issues such as depression or to step in when younger members are trying to determine how best to provide eldercare the perspectives presented in The Aging Family aim to enrich the strategies used **Princeton Alumni Weekly** ,1974
