Ancient Memory Katharine Mawford, Eleni Ntanou, 2021-07-05 Although the recent memory boom has led to increasing interdisciplinary interest there is a significant

gap relating to the examination of this topic in Classics In particular there is need for a systematic exploration of ancient memory and its use as a critical and methodological tool for delving into ancient literature The present volume provides just such an approach theorising the use and role of memory in Graeco Roman thought and literature and building on the background of memory studies The volume s contributors apply theoretical models such as memoryscapes civic and cultural memory and memory loss to a range of authors from Homeric epic to Senecan drama and from historiography to Cicero s recollections of performances The chapters are divided into four sections according to the main perspective taken These are 1 the Mechanics of Memory 2 Collective memory 3 Female Memory and 4 Oblivion This modern approach to ancient memory will be useful for scholars working across the range of Greek and Roman literature as well as for students and a broader interdisciplinary audience interested in the intersection of memory studies and Classics
