The Antitrust Laws A Primer

Earl W. Kintner, Mark R. Joelson

The Antitrust Laws A Primer:

The Antitrust Laws John H. Shenefield, Irwin M. Stelzer, 1996 A former top antitrust officer at the U S Department of Justice and a noted economist guide readers through the increasingly complex antitrust laws A Primer on the Law of Information Exchange ,2002 With the advent of new and more sophisticated information technologies businesspersons have more opportunities to interact and exchange information with their competitors In this climate of free flowing information it is essential that businesspersons are aware of the legal implications of engaging in information exchanges whether in the form of an industry association questionnaire or electronic mail The Section of Antitrust Law of the American Bar Association has developed this general guide to the law of information exchange to aid non antitrust lawyers and business managers understanding of when and how the antitrust laws apply to information exchanges It is written primarily to help businesspersons to understand the risks and comply with the law This primer is not a substitute for legal advice but rather is offered as background to help spot issues so that advice may be sought from an experienced attorney The booklets are about the size of a pocket journal and have a space on the back to identify the law firm or company and contact counsel They are available singly and at substantial discounts in convenient packs of 25 copies each **Antitrust Publications Catalog** ,

An International Antitrust Primer Mark R. Joelson, 2016-04-24 Despite the continuing inter government cooperation over the regulation of international commerce significant cross country differences persist in areas such as merger control notification to authorities and remedies deemed appropriate for antitrust enforcement Accordingly companies must be aware of the rules that apply in the countries in which they do business This fourth edition of the Kintner Joelson classic International Antitrust Primer provides a thorough update of the status of competition regulation in a number of key jurisdictions including up to date case law involving the technology giants Google Microsoft Amazon Apple and Facebook Coverage focuses on the European Union and the United States which continue to be foremost in the enforcement and refinement of comprehensive competition laws but also takes into account the vast strides that are being made elsewhere with chapters on South Korea Japan and India as well as a chapter on the United Kingdom with a section on the post Brexit implications The book provides essential guidance on such issues of concern to business persons and their counsel as the following intellectual property rights extent and kind of criminal sanctions extraterritorial reach mergers and acquisitions level and type of enforcement activity effects of national foreign or domestic policy permissible cooperation among competitors and public procurement Business persons government officials students lawyers and others who have been relying on this preeminent resource for years will greatly appreciate this thoroughly updated edition There is nothing else that so lucidly and helpfully explains competition law for those who require a working knowledge of the subject to proceed confidently in their day to day work **An International Antitrust Primer** Earl W. Kintner, Mark R. Joelson, 1974 *AN INTERNATIONAL ANTITRUST PRIMER. A BUSINESSMAN'S GUIDE TO THE INTERNATIONAL ASPECTS OF UNITED*

STATES ANTITRUST LAW AND TO KEY FOREIGN ANTITRUST LAWS. BY EARL W. KINTNER AND MARK R. JOELSON. Earl W. Kintner, Mark R. Joelson, 1974 *Antitrust Law Journal*, 1986 *A Primer to Antitrust Law and Regulatory Policy* Kenneth M. Parzych, 1987 **Firm Dominance in EU Competition Law** Jorge Marcos Ramos, 2020-02-20

How does it come about that a certain firm dominates a market? Can an understanding of this process lead to a more effective enforcement of competition law? That is the question approached in this compelling book. The author reviews the European Union's EU's Article 102 case law, comparing it with United States US provisions, demonstrating that new ways of looking at market power are needed today's tech giants differ from older monopolies. He clarifies the role of dominant firms in the competitive process, proposing that conduct should be scrutinized differently depending on the source of market power rather than using the same approach for all dominant undertakings. Supporting his contention that the legal consequences that derive from holding a dominant position cannot be disassociated from the sources of that market power, that a dynamic understanding of dominance requires looking both forwards and backwards in time, the author examines such sources of dominance as the following: statutory dominance derived from explicit protectionist measures or subtler geoeconomic strategies; legacy firms such as the telecommunications or transport industries; natural monopolies e.g. the exploitation of a mine; investment efforts undertaken in a competitive environment; intangible resources such as timing, reputation, experience, innovation capabilities or managerial processes; lucky monopolies and anticompetitive behavior on the road to dominance. Drawing insights from EU and US case law, industrial organization scholarship and strategic management literature, the book resolves questions related to the role that the origins of market power have played and should play in the enforcement of EU competition rules against dominant firms. It concludes with a list of policy recommendations bringing the application of Article 102 TFEU against dominant firms more in line with the objective of protecting the competitive process. With its focus on how EU competition law enforcement should be fine-tuned to adequately incorporate the origins of firm dominance into the analysis of single-firm behavior, the book makes a major contribution to the analysis of anticompetitive effects. Practitioners, competition authorities and academics in competition law will greatly appreciate the book's combination of legal analysis and recommendations for policy reform.

Competition Policy, Deregulation, and Modernization in Latin America Moisés Naím, Joseph S. Tulchin, 1999. Providing one of the first studies to explore the topic, the authors trace the development of competition policy in Latin America where that policy stands today and how it may be reconceptualized and deployed as a tool for consolidating the region's economic future. **BOOK JACKET**
