The Ardent Longing:

The Ardent Longing Lydia Torres Tucker, 2001-06-01 **Death and Character** Annette C. Baier, 2008-11-30 Annette Baier goes beyond her earlier work on David Hume to reflect on a topic that links his philosophy to questions of immediate relevance in particular questions about what character is and how it shapes our lives Her reading radically revises the received interpretation of Hume's epistemology and in particular philosophy of mind *The World as Will and Idea 3* Arthur Schopenhauer, 2015-11-23 If the intellect were not of a subordinate nature as the two preceding chapters show then everything which takes place without it i.e. without intervention of the idea such as reproduction the development and maintenance of the organism the healing of wounds the restoration or vicarious supplementing of mutilated parts the salutary crisis in diseases the works of the mechanical skill of animals and the performances of instinct would not be done so infinitely better and more perfectly than what takes place with the assistance of intellect all conscious and intentional achievements of men which compared with the former are mere bungling In general nature signifies that which operates acts performs without the assistance of the intellect Now that this is really identical with what we find in ourselves as will is the general theme of this second book and also of the essay Ueber den Willen in der Natur The possibility of this fundamental knowledge depends upon the fact that in us the will is directly lighted by the intellect which here appears as self-consciousness otherwise we could just as little arrive at a fuller knowledge of it within us as without us and must for ever stop at inscrutable forces of nature We have to abstract from the assistance of the intellect if we wish to comprehend the nature of the will in itself and thereby as far as is possible penetrate to the inner being of nature On this account it may be remarked in passing my direct antipode among philosophers is Anaxagoras for he assumed arbitrarily as that which is first and original from which everything proceeds a an intelligence a subject of ideas and he is regarded as the first who promulgated such a view According to him the world existed earlier in the mere idea than in itself while according to me it is the unconscious will which constitutes the reality of things and its development must have advanced very far before it finally attains in the animal consciousness to the idea and intelligence so that according to me thought appears as the very last However according to the testimony of Aristotle Metaph i 4 Anaxagoras himself did not know how to begin much with his but merely set it up and then left it standing like a painted saint at the entrance without making use of it in his development of nature except in cases of need when he did not know how else to help himself All physico theology is a carrying out of the error opposed to the truth expressed at the beginning of this chapter the error that the most perfect form of the origin of things is that which is brought about by means of an intellect Therefore it draws a bolt against all deep exploration of nature

Life Embodied Nicolás Fernández-Medina, 2018-05-30 The concept of vital force the immanent energy that promotes the processes of life in the body and in nature has proved a source of endless fascination and controversy Indeed the question of what vitalizes the body has haunted humanity since antiquity and became even more pressing during the Scientific

Revolution and beyond Examining the complexities and theories about vital force in Spanish modernity Nicol s Fern ndez Medina s *Life Embodied* offers a novel and provocative assessment of the question of bodily life in Spain Starting with Juan de Cabriada s landmark *Carta filosofica m dico chymica* of 1687 and ending with Ram n G me z de la Serna s avant gardism of the 1910s Fern ndez Medina incorporates discussions of anatomy philosophy science critical theory history of medicine and literary studies to argue that concepts of vital force served as powerful vehicles to interrogate the possibilities and limits of corporeality Paying close attention to how the body s capabilities were conceived and strategically woven into critiques of modernity Fern ndez Medina engages the work of Miguel Boix y Moliner Mart n Mart nez Diego de Torres Villarroel Sebasti n Guerrero Herreros Ignacio Mar a Ruiz de Luzuriaga Gaspar Melchor de Jovellanos Pedro Mata y Fontanet ngela Grassi Juli n Sanz del R o Miguel de Unamuno and P o Baroja among others Drawing on extensive research and analysis *Life Embodied* breaks new ground as the first book to address the question of vital force in Spanish modernity **Forest Voices** Gustav Heinrich Gans Putlitz (Edler Herr von und zu),1866 **Worship** ,1927 Franciscan School of Prayer Christina Mülling,Paul Zahner,2022-04-27 The Franciscan Prayer School would like to show a path that leads step by step into prayer and that seeks to convey the depth and tradition of Franciscan contemplation in a contemporary way The present texts can be taken as a separate personal prayer school for one week for daily contemplation or simply considered as individual elements and deepened personally In the spirit of St Francis it should become clear that Jesus looks at us speaks to us and touches us As a result the heart of man is transformed and widened **The World as Will and Idea** Arthur Schopenhauer,1909 *A Journey into Soulscape* Moin Qazi,2014-01-01 This book is largely a result of notes compiled by the author during the course of his studies and readings that straddled a vast canvas of life spiritualism academics journalism law philosophy and literature It is not a discourse but is truly a journey into the soul and an initiation The pages of this book are a strange mixture of analytic thought mysticism literature eastern philosophies western thought religions the sciences psychology and the arts The book surely has its own window But the window invites us to open our own windows to look through the prism of every human being so that we know understand and appreciate each other better The author has drawn from a vast range of sources that span continents and cultures What emerges is a kaleidoscopic canvas of shimmering stars of wisdom Through this collection of essays the author has tried to open the minds of people to a new view of humanity
The world as will and idea, tr. from the Germ. by R.B. Haldane and J. Kemp Arthur Schopenhauer,1883
