Ann C. Gunter, 2018-09-08 Provides a broad view of the history and current state of scholarship on the art of the ancient Near East. This book covers the aesthetic traditions of Mesopotamia, Iran, Anatolia, and the Levant from Neolithic times to the end of the Achaemenid Persian Empire around 330 BCE. It describes and examines the field from a variety of critical perspectives across approaches and interpretive frameworks, key explanatory concepts, materials, and selected media and formats and zones of interaction. This important work also addresses both traditional and emerging categories of material intellectual perspectives and research priorities. The book covers geography and chronology, context and setting, medium and scale, while acknowledging the diversity of regional and cultural traditions and the uneven survival of evidence. Part One of the book considers the methodologies and approaches that the field has drawn on and refined. Part Two addresses terms and concepts critical to understanding the subjects and formal characteristics of the Near Eastern material record, including the intellectual frameworks within which monuments have been approached and interpreted. Part Three surveys the field's most distinctive and characteristic genres, with special reference to Mesopotamian art and architecture. Part Four considers involvement with artistic traditions across a broader reach, examining connections with Egypt, the Aegean, and the Mediterranean. And finally, Part Five addresses intersections with the closely allied discipline of archaeology and the institutional stewardship of cultural heritage in the modern Middle East. Told from multiple perspectives, *A Companion to Ancient Near Eastern Art* is an enlightening must-have book for advanced undergraduate and graduate students of ancient Near East art and Near East history, as well as those interested in history and art history.

The Concept of Monument in Achaemenid Empire Mehr Azar Soheil, 2018-12-07 The aim of this book is to explore the significance of the concept of monument in the context of the Achaemenid Empire (550–330 BC) with particular reference to the Royal Ensemble of Persepolis, founded by Darius I and built together with his son Xerxes. While Persepolis was built as an intentional monument, it had already become an historic monument during the Achaemenid period. It maintained its symbolic significance in the following centuries, even after its destruction by Alexander of Macedonia in 330 BC. The purpose of building Persepolis was to establish a symbol and a common reference for the peoples of the Empire with the Achaemenid Dynasty, transmitting significant messages and values such as peace, stability, grandeur, and praise for the dynastic figure of the king as the protector of values and fighting falsehood. While previous research on Achaemenid heritage has mainly been on archaeological and art historical aspects of Persepolis, the present work focuses on the architecture and design of Persepolis. It is supported by studies in the fields of archaeology, history, and art history, as well as by direct survey of the site. The morphological analysis of Persepolis, including the study of the proportions, elevations, and the verification of a planning grid for the layout of the entire ensemble, demonstrate the univocal will by Darius to plan Persepolis following a precise initial scheme. The study shows how the inscriptions, bas-reliefs, and the innovative architectural language together express the symbolism, values, and political messages of the Achaemenid Dynasty, exhibiting influence from different lands in a new

architectural language and in the plan of the entire site *Sumerian Gods and Their Representations* Geller,1997

Iconographic Exegesis of the Hebrew Bible / Old Testament Izaak Jozias de Hulster, Brent A. Strawn, Ryan P. Bonfiglio, 2015-10-28 Iconographic exegesis combines the study of biblical texts exegesis with the study of ancient expressions of visual art iconography Studying ancient visual art that is contemporary with the documents of the Old Testament gives remarkable insight not only on the meaning and historical context of the biblical text but also because it facilitates greater understanding of how the ancient authors and audiences saw thought and made sense of the world Iconography thus merits close attention as another avenue that can lead to a more nuanced and more complete understanding of the biblical text Each chapter of this book provides an exegesis of a particular biblical text or theme The book is organized around the tripartite structure of the Hebrew Bible and demonstrates that iconographical exegesis is pertinent to every nook and cranny of the Bible Within the three parts there is special emphasis on Genesis Isaiah and the Psalms in order to make the book attractive for classes that deal with one or more of these books and might therefore include an iconographic perspective In addition to connecting with a major issue in biblical interpretation theology or visual studies each chapter will end with one or two exercises directing the reader student to comparable texts and images enabling them to apply what was described in the chapter for themselves This approach enables beginners as well as advanced readers to
