The Satirist, Or Monthly Meteor, 1808 *The History of Meteoritics and Key Meteorite Collections* Gerald Joseph Home McCall, A. J. Bowden, Richard John Howarth, 2006

This Special Publication has 24 papers with an international authorship and is prefaced by an introductory overview which presents highlights in the field. The first section covers the acceptance by science of the reality of the falls of rock and metal from the sky: an account that takes the reader from BCE before common era to the nineteenth century. The second section details some of the world's most important collections in museums, their origins and development. The Smithsonian chapter also covers the astonishingly numerous finds in the cold desert of Antarctica by American search parties. There are also contributions covering the finds by Japanese parties in the Yamato mountains and the equally remarkable discoveries in the hot deserts of Australia, North Africa, Oman, and the USA. The other seven chapters take the reader through the revolution in scientific research on meteoritics in the later part of the twentieth century, including terrestrial impact cratering and extraordinary showers of glass from the sky (tektites, now known to be Earth impact sourced). Finally, the short epilogue looks to the future.
