The Definition Of Free Will A Biophilosophic Viewpoint:

The Definition of Free Will Michael Ferketic, 2004-10 What exactly is free will how do we utilize it and how is it influenced by other factors such as experiences perceptions feelings and emotions Does free will exist or has every choice we have ever made already been predetermined In this thought inspired biologically based novel theory Michael Ferketic attempts to crack the philosophical nut that is free will Using old and recent knowledge this theory of free will is designed around the central concept of attention and focus being the point of control of our attention It includes how events of our daily lives shape the choices we make and also shows how perceptions feelings and emotions are instrumental in how we choose to focus our attention You will find a strong biologically objective viewpoint that opens itself to many points of interpretation on not only a biological level but also a social spiritual and meta physical level *Biophilosophy* Rolf Sattler, 2012-12-06 This book is an introduction to biophilosophy written primarily for the student of biology the practicing biologist and the educated layperson It does not presuppose technical knowledge in biology or philosophy However it requires a willingness to examine the most basic foundations of biology which are so often taken for granted Furthermore it points to the bottomlessness of these foundations the mystery of life the Unnamable I have tried to further the awareness that biological statements are based on philosophical assumptions which are present in our minds even before we enter the laboratory These assumptions which often harbor strong commitments are exposed throughout the book I have tried to show how they influence concrete biological research as well as our personal existence and society Thus emphasis is placed on the connection between biophilosophy and biological research on the one hand and biophilosophy and the human condition on the other

Untying the Gordian Knot Timothy E. Eastman, 2020-12-10 In *Untying the Gordian Knot* Process Reality and Context Timothy E Eastman proposes a new creative synthesis the Logoi framework which is radically inclusive and incorporates both actuality and potentiality to show how the fundamental notions of process logic and relations woven with triads of input output context and quantum logical distinctions can resolve a baker's dozen of age old philosophic problems Further Eastman leverages a century of advances in quantum physics and the Relational Realism interpretation pioneered by Michael Epperson and Elias Zafiris and augmented by the independent research of Ruth Kastner and Hans Primas to resolve long standing issues in understanding quantum physics Adding to this Eastman makes use of advances in information and complex systems semiotics and process philosophy to show how multiple levels of context combined with relations including potential relations both local and local global can provide a grounding for causation emergence and physical law Finally the Logoi framework goes beyond standard ways of knowing that of context independence science and context focus arts humanities to demonstrate the inevitable role of ultimate context meaning spiritual dimension as part of a transformative ecological vision which is urgently needed in these times of human and environmental crises

The Family in the New Millennium Thomas B. Holman, A. Loveless, 2006-12-30 A remarkable team of contributors based across 19 countries

explores and explains events worldwide affecting the natural family married father and mother with biological children detailing concepts and benefits of natural family that have been taken for granted across centuries but are now being challenged in many ways These scholars many admittedly taking stands that may be deemed politically incorrect conclude that natural family is being threatened and is vital to provide common ground among all societies cultures and religious traditions Psychologists sociologists economists theologians lawyers health care professionals and award winning journalists are among the chapter authors as are Nobel Prize Laureate Gary Becker U S Department of Health Assistant Secretary for Children and Families Wade Horn and former Prime Minister of Malaysia Mahathir Bin Mohamad Whether or not you agree with their arguments science and conclusions you ll want to know what these influential figures are saying Addressing many lightning rod issues from divorce and abortion to euthanasia and same sex marriage writers here span the world from the United States Canada and the United Kingdom to Australia Turkey India and China Intellectuals included are associated with institutions from Brigham Young University Georgetown School of Medicine and the Boston College School of Law to the University of Geneva and the Maxim Institute in New Zealand

Life and Process Spyridon A. Koutroufinis, 2014-05-21

Alfred North Whitehead is arguably the most original 20th century philosopher of nature and metaphysics In recent decades a number of physicists have produced ground breaking new theories in fundamental physics influenced by his process philosophy In contrast few biologists are even aware that Whitehead s radical rethinking of the Cartesian assumptions implicit in 19th century sciences might be relevant to their enterprise This book seeks to fill this gap by exploring how Whitehead s process ontology might provide a new philosophical foundation for the biosciences of the 21st century The central premise shared by all of the volume s authors is the idea that all living processes are irreducible processes Each chapter focuses on assumptions implicit in some of the core concepts of biology such as organism evolution information and teleology that play crucial explanatory roles in the biosciences but as metaphysical concepts fall outside its purview The authors each identify important shortcomings implicit in contemporary biological paradigms and show how an approach grounded in a process oriented metaphysics can avoid them

Geontologies Elizabeth A. Povinelli, 2016-09-15 In *Geontologies* Elizabeth A Povinelli continues her project of mapping the current conditions of late liberalism by offering a bold retheorization of power Finding Foucauldian biopolitics unable to adequately reveal contemporary mechanisms of power and governance Povinelli describes a mode of power she calls geontopower which operates through the regulation of the distinction between Life and Nonlife and the figures of the Desert the Animist and the Virus *Geontologies* examines this formation of power from the perspective of Indigenous Australian maneuvers against the settler state And it probes how our contemporary critical languages anthropogenic climate change plasticity new materialism antinormativity often unwittingly transform their struggles against geontopower into a deeper entwinement within it A woman who became a river a snakelike entity who spawns the fog plesiosaurus fossils and vast networks of rock weirs in

asking how these different forms of existence refuse incorporation into the vocabularies of Western theory Povinelli provides a revelatory new way to understand a form of power long self evident in certain regimes of settler late liberalism but now becoming visible much further beyond **Paths to Knowledge** Barbara Sarter,1988 **The Philosopher's Index** ,2007 Vols for 1969 include a section of abstracts *Eco-Theory and Annihilation* Evan Gottlieb,2025-03-06 Eco theory and Annihilation is part of the Film Theory in Practice series which blends the explanation of a film theory with the interpretation of a film and provides discrete examples of how film theory can serve as the basis for textual analysis This book offers a concise introduction to eco theory in jargon free language and shows how this theory can be deployed to interpret Alex Garland s controversial film adaptation of Jeff VanderMeer s hit novel Annihilation Eco theory is one of the most exciting and timely offshoots of contemporary critical theory but it is too frequently treated as only a recent development Covering historical developments in nature philosophy geology and organic chemistry as well as contemporary critical methodologies like systems theory and new materialism Eco Theory and Annihilation introduces readers to the full extent of eco theory s lively variations as well as investigates the complications that arise when those variations are mediated by the generic expectations of filmic science fiction This book illuminates the deep history of eco theory maps its contemporary coordinates and demonstrates how it can shed light on Garland s provocative eco sci fi thriller
