Essentials of Econophysics

Modelling Frantisek Slanina, 2014 This book is a course in methods and models rooted in physics and used in modelling economic and social phenomena It covers the discipline of econophysics which creates an interface between physics and economics Besides the main theme it touches on the theory of complex networks and simulations of social phenomena in general After a brief historical introduction the book starts with a list of basic empirical data and proceeds to thorough investigation of mathematical and computer models Many of the models are based on hypotheses of the behaviour of simplified agents These comprise strategic thinking imitation herding and the gem of econophysics the so called minority game At the same time many other models view the economic processes as interactions of inanimate particles Here the methods of physics are especially useful Examples of systems modelled in such a way include books of stock market orders and redistribution of wealth among individuals Network effects are investigated in the interaction of economic agents The book also describes how to model phenomena like cooperation and emergence of consensus The book will be of benefit to graduate students and researchers in both Physics and Economics

Piracy and Maritime Terrorism Silvia Ciotti Galletti, 2012 For much of history pirates and buccaneers constituted one of the most serious threats to maritime activities all over the world More recently apart from adventure stories and swashbuckling films maritime piracy was largely thought of as a thing of the past This began to change in 1994 when an article in the Far Eastern Economic Review drew public attention to the renaissance of a phenomenon piracy was back and it was becoming increasingly violent involving huge ships in international waters This book is based on the proceedings of the NATO Advanced Research Workshop held in 2009 in Lisbon Portugal Its main purpose was to promote dialogue on the phenomenon of maritime piracy between international policymakers law enforcement officers port authorities and other professionals and to provide a response to the need for research and analysis at an international level on maritime piracy and its connection to terrorism The book does not simply report on the proceedings of the workshop but also includes some new topics not covered by the ARW and is organized in three sections new methodological approaches to maritime threats new threats and new challenges in piracy and maritime terrorism and lastly some selected case studies different threats different solutions The book offers qualified ideas opinions and talking points to the international practitioner community will foster debate and help law enforcement agencies and

policymakers to face the new world wide maritime threats of piracy and terrorism
