The Dissociative Child Diagnosis Treatment And Management:

The Dissociative Child Joyanna L. Silberg, 1996 *Encyclopedia of Adolescence* Roger J.R. Levesque, 2014-07-08 The Encyclopedia of Adolescence breaks new ground as an important central resource for the study of adolescence Comprehensive in breadth and textbook in depth the Encyclopedia of Adolescence with entries presented in easy to access A to Z format serves as a reference repository of knowledge in the field as well as a frequently updated conduit of new knowledge long before such information trickles down from research to standard textbooks By making full use of Springer's print and online flexibility the Encyclopedia is at the forefront of efforts to advance the field by pushing and creating new boundaries and areas of study that further our understanding of adolescents and their place in society Substantively the Encyclopedia draws from four major areas of research relating to adolescence The first broad area includes research relating to Self Identity and Development in Adolescence This area covers research relating to identity from early adolescence through emerging adulthood basic aspects of development e g biological cognitive social and foundational developmental theories In addition this area focuses on various types of identity gender sexual civic moral political racial spiritual religious and so forth The second broad area centers on Adolescents Social and Personal Relationships This area of research examines the nature and influence of a variety of important relationships including family peer friends sexual and romantic as well as significant nonparental adults The third area examines Adolescents in Social Institutions This area of research centers on the influence and nature of important institutions that serve as the socializing contexts for adolescents These major institutions include schools religious groups justice systems medical fields cultural contexts media legal systems economic structures and youth organizations Adolescent Mental Health constitutes the last major area of research This broad area of research focuses on the wide variety of human thoughts actions and behaviors relating to mental health from psychopathology to thriving Major topic examples include deviance violence crime pathology DSM normalcy risk victimization disabilities flow and positive youth development **Dissociation in Traumatized Children and Adolescents** Sandra Wieland, 2015-03-27

Dissociation in Traumatized Children and Adolescents presents a series of unique and compelling case studies written by some of the foremost international experts in the study of dissociation in young people In the new edition chapters have been updated to include discussion of the most recent findings in trauma and neuroscience as well as Joyanna Silberg's popular affect avoidance model In addition Sandra Wieland's incisive commentaries on each case study have been updated Each chapter presents a detailed narrative of a therapist's work with a child or adolescent interspersed with the therapist's own thought process and every therapist explains the theory and research behind her clinical decisions The case studies present many aspects of working with traumatized children attachment work trauma processing work with the family interactions with the community psychoeducation related to dissociation and encouragement of communication between the dissociated parts and provide a frank analysis of the difficulties clinicians encounter in various therapeutic situations While the book is

exceptional in its clear and detailed descriptions of theory related to dissociation in children most importantly it illustrates how theory can be translated into successful therapeutic interactions

Handbook of Conceptualization and Treatment of Child Psychopathology Helen Orvaschel, Michel Hersen, Jan Faust, 2001-12-06 Handbook of Conceptualization and Treatment of Child Psychopathology evaluates and illustrates the integration of conceptualization and treatment of child and adolescent psychopathology Organized into seven parts this book first discusses the issues of conceptualization and developmental considerations in treatment Subsequent part delineates treatment models and specific interventions for disruptive behavior disorders Parts III VI elucidate mood anxiety eating and substance use disorders The last part covers firesetting trichotillomania elimination disorders schizophrenia sleep problems and dissociative disorders This handbook is an educational tool for graduate students and a resource for psychologists psychiatrists school counselors social workers and other mental health practitioners who treat children and adolescents and their families

Handbook of Developmental Psychopathology Michael Lewis, Karen D. Rudolph, 2014-04-09 When developmental psychologists set forth the theory that the roots of adult psychopathology could be traced to childhood experience and behavior the idea quickly took hold Subsequently as significant research in this area advanced during the past decade more sophisticated theory more accurate research methodologies and improved replication of empirical findings have been the result The Third Edition of the Handbook of Developmental Psychopathology incorporates these research advances throughout its comprehensive up to date examination of this diverse and maturing field Integrative state of the art models document the complex interplay of risk and protective factors and other variables contributing to normal and pathological development New and updated chapters describe current refinements in assessment methods and offer the latest research findings from neuroscience In addition the Third Edition provides readers with a detailed review across the spectrum of salient topics from the effects of early deprivation to the impact of puberty As the field continues to shift from traditional symptom based concepts of pathology to a contemporary dynamic paradigm the Third Edition addresses such key topics as Early Childhood disorders including failure to thrive and attachment disorders Aggression ADHD and other disruptive conditions Developmental models of depression anxiety self injury suicide and OCD The autism spectrum and other chronic developmental disorders Child maltreatment and trauma disorders The Third Edition of the Handbook of Developmental Psychopathology is a discipline defining forward looking resource for researchers clinicians scientist practitioners and graduate students in such fields as developmental psychology psychiatry social work child and school psychology educational psychology and pediatrics p
