The Development Of Cotton Textile Production In China

Brendan G. Carr

The Development Of Cotton Textile Production In China:

The Development of Cotton Textile Production in China Kang Chao, 2020-03-17 There are many studies of the Chinese cotton textile industry for various time periods But most of them are rather limited in the scope of inquiry and occasionally their interpretations cannot stand rigorous economic reasoning The present study is an attempt to reorganized the data which are widely scattered in an extremely large number of Chinese historical documents and modern writings in a systematic fashion and to provide an economic analysis This study covers the entire history of the industry **Communist China's Cotton Textile Exports** Bernice M. Hornbeck, United States. Foreign Agricultural Service, 1956 **The Ashgate Companion to the History of Textile Workers, 1650-2000** Els Hiemstra-Kuperus, 2016-04-01 This impressive collection offers the first systematic global and comparative history of textile workers over the course of 350 years This period covers the major changes in wool and cotton production and the global picture from pre industrial times through to the twentieth century After an introduction the first part of the book is divided into twenty national studies on textile production over the period 1650 2000 To make them useful tools for international comparisons each national overview is based on a consistent framework that defines the topics and issues to be treated in each chapter The countries described have been selected to included the major historic producers of woollen and cotton fabrics and the diversity of global experience and include not only European nations but also Argentina Brazil China Egypt India Japan Mexico Turkey Uruguay and the USA The second part of the book consists of ten comparative papers on topics including globalization and trade organization of production space identity workplace institutions production relations gender ethnicity and the textile firm These are based on the national overviews and additional literature and will help apply current interdisciplinary and cultural concerns to a subject traditionally viewed largely through a social and economic history lens Whilst offering a unique reference source for anyone interested in the history of a particular country s textile industry the true strength of this project lies in its capacity of international comparison By providing global comparative studies of key textile industries and workers both geographically and thematically this book provides a comprehensive and contemporary analysis of a major element of the world s economy This allows historians to challenge many of the received ideas about globalization for instance highlighting how global competition for lower production costs is by no means a uniquely modern issue and has b **Collections of United States Joint Publications Research Service Translations in the Social Sciences Emanating from Communist China** United States. Joint Publications Research Service, 1961 **China's Economic Development** Alexander Eckstein, 2025-10-01 China s Economic Development The Interplay of Scarcity and Ideology by Alexander Eckstein provides a comprehensive analysis of China s economic growth and transformation from a socialist economy Eckstein examines the unique challenges China faced in addressing its economic backwardness such as scarcity of resources and ideological constraints and compares its industrialization to other countries The book explores how Maoist ideology and policy initiatives impacted the country s

economic strategies leading to a fluctuating development pattern characterized by rapid expansion in the 1950s and stagnation in the 1960s Key themes include the dichotomy between scarcity and ideology the influence of historical factors on economic structures and the adaptation to Soviet models Eckstein sheds light on how China navigated its unique size population pressures and low per capita income arguing that understanding these dynamics is crucial for both development theory and policy design This volume part of the Michigan Studies on China series compiles essays and research that contribute to a nuanced understanding of China's economic systems with particular focus on the tensions between ideological aspirations and economic realities

General History Of China's Foreign Trade, A (Volume 1) Yuqin Sun,Xu Chang,2024-02-08 China boasts a long history of foreign trade As early as the pre Qin period residents of the country began to ship silk and other merchandise on outbound voyages From the 2nd century BCE on China has been connected to the rest of the world via the Overland Silk Road and the Maritime Silk Road initiated in the reign of Emperor Wu of the Western Han Dynasty Trade relations between China and other regions in the world have been developing gradually and continuously Trade has contributed to deepening economic and cultural exchanges between China and other countries While benefiting the whole of humankind Chinese civilization has also absorbed the achievements of other civilizations allowing China and other countries to experience mutual benefits and advance together This is the first volume in a series of books retelling the arduous development of China's foreign trade It covers ancient times recording China's foreign trade from the pre Qin period to the early period of the Qing Dynasty

China's Economic Revolution Alexander Eckstein,1977-05-27 Professor Eckstein's book is a study of China's efforts to achieve rapid modernization of its economy within a socialist framework Eckstein begins with an examination of economic development in pre Communist China specifically focusing on the resources and liabilities inherited by the new regime in 1949 and their effects on development policies He then analyses the economic objectives of the Communist leadership narrowing income disparities maintaining full employment without inflation and achieving rapid industrialization and argues that the implementation of these goals required a potent ideology capable of providing a strong faith and motivational force for the mass mobilization of resources In discussing the methods used by the government to achieve its aims Eckstein makes a thorough evaluation of China's general framework for economic planning particularly in regard to the distribution and pricing of farm products and the allocation of resources in the industrial sector The author also evaluates the radical institutional changes in property relations and in economic organization in the People's Republic of China

Transnational Corporations Geoffrey Jones,1993

A History of Qing Economy Studies Zhu Hu,2023-11-29 This book is a historiographical study of the economic history of the Qing dynasty that systematically examines the research paradigms underlying the range of historical studies conducted over the past century In reviewing historical studies of the economic history of the Qing dynasty from an epistemological and methodological perspective the book explores how this research area emerged and developed and explores the three major paradigms that dominate the

field the revolutionary historical paradigm based on productive relations the modernization paradigm centring on productivity and the Chinese centric approach that seeks to understand the internal momentum of economic development It is shown that shifts in paradigms derive not only from the linear derivation of academic ideas but are also closely related to wider changes in society and social discourse Hence the author proposes an approach that studies economic and social history with an emphasis on social practice shedding light on a better understanding of the direction of China s economic history The title will benefit scholars and students interested in economic history and modern Chinese history **Foreign Agriculture ,**
