Myers,2008-10-01 DIVFor Americans entering the twenty first century it is the best of times and the worst of times Material wealth is at record levels yet disturbing social problems reflect a deep spiritual poverty In this compelling

book well known social psychologist David G Myers asks how this paradox has come to be and more important how we can spark social renewal and dream a new American dream Myers explores the research on social ills from the 1960s through the 1990s and concludes that the materialism and radical individualism of this period have cost us dearly imperiling our children corroding general civility and diminishing our happiness However in the voices of public figures and ordinary citizens he now hears a spirit of optimism The national dialogue is shifting away from the expansion of personal rights and toward enhancement of communal civility away from efforts to raise self esteem and toward attempts to arouse social responsibility away from whose values and toward our values Myers analyzes in detail the research on educational and other programs that deal with social problems explaining which seem to work and why He then offers positive and well reasoned advice suggesting that a renewed social ecology for America will rest on policies that balance me thinking with we thinking div

A Christian Spirituality and Psychotherapy Richard H. York,2009-06-01 This book describes a method of therapy based upon the Christian spirituality and psychotherapy perspective developed by Dr Richard York This clinical theology perspective is a phenomenological approach that integrates spiritual theological and psychological concepts and

was developed in large part through York's own experience of being relieved of depression and anxiety through interweaving of psychotherapy prayer and meditation spiritual direction and the relationship with his Indwelling Spirit Because human beings are the products of relationships York critiques approaches to psychology premised upon the subject object epistemology of empirical science that study human behavior He suggests instead that a relational ontology research method offers an approach superior to that of standard psychotherapy and uses experience in relationship as the fundamental concept in this clinical theology Because people are prone to hurt themselves and others York also argues that standard approaches to psychology need to develop a psychology of sin and evil including some form of a Higher Power as essential parts of the spiritual aspect of psychotherapy York critiques Christian theologians for developing theology that seldom uses empirical data and that is irrelevant to the process of helping people heal and grow He criticizes those pastoral ministers who moralize with people instead of listening to them as well as those who preach more about sin and suffering than God's presence and saving grace through the forgiveness of sins While he acknowledges that most of his perspective is not new York does offer a unique contribution to the field of psychotherapy through the concept of the Indwelling Spirit He describes how the Indwelling Spirit works in psychotherapy and the various techniques to access it He further argues that his experience as a gay psychologist is an essential aspect of his method because in being healed through his experience with his Indwelling Spirit he was able to define this experience for use in psychotherapy an insight used by very few straight therapists York challenges the notion of how a gay man who worships God regularly found healing through a relationship with Christ in the Holy Spirit of God and developed the concept of the Indwelling Spirit for psychotherapy could be considered objectively disordered and intrinsically evil by the Roman Catholic Magisterium Furthermore York describes a new principle of moral theology for sexual relationships based on love rather than procreation and suggests seven research hypotheses to study the phenomenon of the Indwelling Spirit and the love that is exhibited in both same sex and opposite sex relationships **Social Service Abstracts** ,1979 **Resources in Education** ,1995 **The Thoughts and Studies of**

Herford Clone Being Stephen E. Levick, 2004 Most people think the risks of reproductive cloning are so high as to make
trying to clone a person immoral Even if the medical risks could be reduced greatly many believe a clone would still risk
great psychological harm and that the practice of reproductive cloning would also be detrimental to society Others dismiss
these concerns as speculative and point to the possible good they believe it could do But we need not wait for the first clone
to be born to systematically consider the possible psychological and social ramifications of cloning Marshalling psychological
and sociological theory and research and drawing upon extensive clinical experiences as a psychiatrist and psychotherapist
Levick explores the various dimensions of cloning Clone Being attempts to anticipate possible consequences for a clone his or
her parents and family and society Psychotherapy case material enlivens and illustrates the book and the reader is helped to
identify clone like aspects of his or her own experience and mental life and of contemporary life Through this process the
book comes to important conclusions about human nature including the crucial roles of intimacy sex and sexuality for society
The clinical and scientifically grounded insights of this book should help inform the reader s ethical judgments and attitudes
about cloning people **New Directions in Picturebook Research** Teresa Colomer, Bettina Kümmerling-Meibauer, Cecilia
Silva-Díaz, 2010-07-12 In this new collection children s literature scholars from twelve different countries contribute to the
ongoing debate on the importance of picturebook research focusing on aesthetic and cognitive aspects of picture books
Contributors take interdisciplinary approaches that integrate different disciplines such as literary studies art history
linguistics narratology cognitive psychology sociology memory studies and picture theory Topics discussed include
intervisuality twist endings autobiographical narration and metaliterary awareness in picturebooks The essays also examine
the narrative challenges of first person narratives ellipsis and frame breaking in order to consider the importance of
mindscape as a new paradigm in picturebook research Tying picturebook studies to studies in childhood multimodality and
literacy this anthology is a representative of the different opportunities for research in this emerging field
