The Oxford Handbook of the Phenomenology of Music Cultures Harris M. Berger, Friedlind Riedel, David VanderHamm, 2024 This handbook is currently in development with individual articles publishing online in advance of print publication At this time we cannot add information about unpublished articles in this handbook however the table of contents will continue to grow as additional articles pass through the review process and are added to the site Please note that the online publication date for this handbook is the date that the first article in the title was published online **City** Stephen B. Scharper, Ingrid Leman-Stefanovic, 2012-01-01 Urban and natural environments are often viewed as entirely separate entities human settlements as the domain of architects and planners and natural areas as untouched wilderness This dichotomy continues to drive decision making in subtle ways but with the mounting pressures of global climate change and declining biodiversity it is no longer viable New technologies are promising to provide renewable energy sources and greener designs but real change will require a deeper shift in values attitudes and perceptions A timely and important collection The Natural City explores how to integrate the natural environment into healthy urban centres from philosophical religious socio political and planning perspectives Recognizing the need to better link the humanities with public policy The Natural City offers unique insights for the development of an alternative vision of urban life Innovation in Music: Adjusting Perspectives Jan-Olof Gullö, Russ Hepworth-Sawyer, Dave Hook, Mark Marrington, Justin Paterson, Rob Toulson, 2024-12-30 Innovation in Music Adjusting Perspectives brings together cutting edge research on new innovations in the field of music production technology performance and business With contributions from a host of well respected researchers and practitioners this volume provides crucial coverage on the relationship between innovation and rebellion Including chapters on generative AI gender equality live music quantisation and composition this book is recommended reading for music industry researchers working in a range of fields as well as professionals interested in industry innovations

Shakespeare and the Future of Theory François-Xavier Gleyzon, Johann Gregory, 2017-10-02 Shakespeare and the Future of Theory convenes internationally renowned Shakespeare scholars and scholars of the Early Modern period and presents discusses and evaluates the most recent research and information concerning the future of theory in relation to Shakespeare s corpus Original in its aim and scope the book argues for the critical importance of thinking Shakespeare now and provides extensive reflections and profound insights into the dialogues between Shakespeare and Theory Contributions explore Shakespeare through the lens of design theory queer theory psychoanalysis Derrida and Foucault amongst others and offer

an innovative interdisciplinary analysis of Shakespeare's work This book was originally published as two special issues of Architectural Acoustics Raj Patel, 2020-03-19 This book is an authoritative but uniquely accessible and **English Studies** highly illustrated guide to good acoustic design practice for architects interior designers and acoustic professionals It provides a user friendly introduction to architectural acoustics and acoustics technology where the market is crowded with dense and technical texts It will go through each typology in turn explaining the key acoustic concepts with highly illustrated and international case studies that demonstrate cutting edge practice and technology innovative design techniques and common challenges and solutions The Sound of Architecture Angeliki Sioli, Elisavet Kiourtsoglou, 2022-05-18 How sound and its atmospheres transform architecture Acoustic atmospheres can be fleeting elusive or short lived Sometimes they are constant but more often they change from one moment to the next forming distinct impressions each time we visit certain places Stable or dynamic acoustic atmospheres have a powerful effect on our spatial experience sometimes even more so than architecture itself This book explores the acoustic atmospheres of diverse architectural environments in terms of scale program location or historic period providing an overview of how acoustic atmospheres are created perceived experienced and visualized The contributors explore how sound and its atmospheres transform architecture and space Their essays demonstrate that sound is a tangible element in the design and staging of atmospheres and that it should become a central part of the spatial explorations of architects designers and urban planners The Sound of Architecture will be of interest to architectural historians theorists students and practicing architects who will discover how acoustic atmospheres can be created without complex and specialized engineering It will also be of value to scholars working in the field of history of emotions as it offers evocative descriptions of acoustic atmospheres from diverse cultures and time periods

Architectures of Sound Michael Fowler,2017-10-23 Architects are used to designing visually In order to expand their basic design tools this book explores the interactions between sound space hearing and architecture To this end the author uses contemporary and historic buildings and projects but also fictional philosophical and theoretical approaches the idea is not only to define sound as a source but also as an instrument of architectural space By introducing a metatheory of critical hearing designers are able to acoustically test their projects and contribute to their design with auditive input already at the design stage
Invisible Reconstruction Lucia Patrizio Gunning, Paola Rizzi, 2022-12-06 What does it really mean to reconstruct a city after a natural biological or man made disaster Is the repair and reinstatement of buildings and infrastructure sufficient without the mending of social fabric The authors of this volume believe that the true measure of success should be societal After all a city without people is no city at all Invisible Reconstruction takes the view that effective disaster mitigation and recovery require interdisciplinary tactics Historian Lucia Patrizio Gunning and urbanist Paola Rizzi expand beyond the confines of individual disciplines or disaster studies to bring together academics and practitioners from a wide variety of disciplines comparing strategies and outcomes in different scenarios and cultures from South America Europe

and Asia From cultural heritage and public space to education and participation contributors reflect on the interconnection of people culture and environment and on constructive approaches to strengthening the intangible ties to increase resilience and reduce vulnerability By bringing practical examples of how communities and individuals have reacted to or prepared for disaster the publication proposes a shift in public policy to ensure that essential physical reinforcement and rebuilding are matched by attention to societal needs Invisible Reconstruction is essential reading for policymakers academics and practitioners working to reduce the impact of natural biological and man made disaster or to improve post disaster recovery
