## **Small Groups As Complex Systems Formation Coordination Development And Adaptation:**

Small Groups as Complex Systems Holly Arrow, Joseph E. McGrath, Jennifer L. Berdahl, 2000-03-21 What are groups How do they behave Arrow McGrath and Berdahl answer these questions by developing a general theory of small groups as complex systems Basing their theory on concepts distilled from general systems theory dynamical systems theory and complexity and chaos theory they explore groups as adaptive dynamic systems that are driven by interactions among group members as well as between the group and its embedding contexts In addition they consider not only the group's members and their distribution of attributes but also the group's tasks and technology in order to understand how those members tasks and tools are intertwined coordinated and adjusted Throughout the book the authors focus our attention on relationships among people tools and tasks that are activated by a combination of individual and collective purposes and goals that change and evolve as the group interacts over time

**Small Groups as Complex Systems** Holly Arrow, 2000 This general theory of small groups as complex systems draws on general systems theory dynamical systems theory and complexity and chaos theory in offering a more complete understanding of the nature of group behaviour and the factors which shape it

Decision Modeling and Behavior in Complex and Uncertain Environments Tamar Kugler, J. Cole Smith, Terry Connolly, Young-Jun Son, 2008-07-20. On February 27 and 28 of 2006 the University of Arizona held a workshop entitled Decision Modeling and Behavior in Uncertain and Complex Environments sponsored by the Air Force Office of Scientific Research under a Multidisciplinary University Research Initiative (MURI) grant. The purpose of the workshop was to assemble preeminent researchers studying problems at the interface of behavioral and cognitive science decision analysis and operations research. This book is a compilation of 14 chapters based on the presentations given during the workshop. These contributions are grouped into four general areas which describe in some detail the challenges in conducting novel research in this field. Part One is concerned with the need for integrating decision analysis and behavioral models. Robert T. Clemen discusses how the fields of behavioral search and decision analysis have diverged over time and makes a compelling case to establish new links between the disciplines. He recommends leveraging lessons learned from behavioral studies within prescriptive decision analysis studies and evaluating the practical impact of those prescriptive techniques in helping decision makers achieve their objectives. Jenna L. Marquard and Stephen M. Robinson address eleven common traps that face decision model analysts and users. An understanding of these traps leads to an understanding of modeling features that either help or hurt the decision making process. The authors link theory and practice by examining a set of case studies across a diverse array of model scenarios and provide a checklist of recommendations for analysts confronted by these eleven traps.
