Materials and Audiovisuals Shirley King Evans,1989 **School Days in Vietnam Stories from the Heart** Larry Welch,2015-08-29 School Days in Vietnam is the third book in a trilogy that encompass five years of teaching English in Thailand Myanmar and Vietnam I only taught for a year in Hanoi and used the second year to travel and carry on with other

missions in my life that included writing much of this book and other stories about travel I had wanted to live in Hanoi since first visiting in 2004 but the opportunity didn't present itself until eight years later through employment as an English teacher in an international school. In my mind I had high expectations and a goal of remaining in Hanoi for two years. Everything was more interesting and meaningful than I could have expected and at the end of two years I felt tied to my friendships and the amazing lifestyle that was simple yet lavish in humanity. I was totally enamored with Vietnam, the people, the natural beauty of its diverse geography and the culture that separates it from all other nations. I made more friends than I had in any other country and in North Vietnam I enjoyed a weather pattern that was near to the tropics but decidedly four seasons.

ESL Standards for Pre-K-12 Students Teachers of English to Speakers of Other Languages, 1997. The guide outlines performance standards for each of three broad goals of English as a Second Language teaching in elementary and secondary education. The three goals include use of English to communicate in social settings, use of English to achieve academically in all content areas, and use of English in socially and culturally appropriate ways. Within each of these three goals, three more specific performance standards are enumerated. An introductory section explains the rationale, origins, and use of these standards. Subsequent sections, one for each grade group (pre-K, 3, 4, 8, 9, 12), detail appropriate descriptors and progress indicators for each standard for students at that level. In addition, a brief vignette illustrates their use in the classroom, and some further discussion follows. A glossary is included, and supporting documentation is appended. Contains 57 references.

Innovations in online teaching and learning Judah P. Makonye, Nokulunga S. Ndlovu, 2023-03-01. This book's research is on online pedagogical approaches devised by teacher educators and researchers to circumvent a face-to-face curriculum delivery during the COVID-19 pandemic. The challenge faced by educators was that they were uncertain of how to use digital technologies in teaching, learning, and assessment productively. This book reports on case studies on teaching student teachers with technology in a way that advanced not only communication but also the cognitive growth of students in relation to disciplinary knowledge. The scholars from South African universities used both conceptual and empirical methodologies, mostly in qualitative set-ups. The scholarly contributions in this book are varied. They cover theoretical nuances for ICT use in education, considerations for the use of computers in the classroom, pedagogical thinking, and pedagogical integration of ICTs in education, affordances of iPads in visible teaching and learning, supporting student cognition in Languages, Mathematics, Science, Engineering, Graphics, and Design with ICTs. The use of software applications such as GeoGebra and Excel in teaching and learning mathematics is researched among others. The rich discussions that emerged from their research enable academics to learn from others' innovative moments that came as a result of pandemic pressure. The recommendations in this book can be used in blended learning beyond the COVID-19 era as curriculum delivery.
