Gun Control Legislation William J. Krouse, 2010 Congress has continued to debate the efficacy and constitutionality of federal regulation of firearms and ammunition with strong advocates arguing for and against greater gun control Past

legislative proposals have raised the following questions What restrictions on firearms are permissible under the Constitution Does gun control help reduce violent crime Would household street corner and schoolyard disputes be less lethal if firearms were more difficult to acquire Or would more restrictive gun control policies diminish an individual s ability to defend himself Speaking to these questions either in whole or part on June 26 2008 the Supreme Court issued its decision in *District of Columbia v Heller* and found that the District of Columbia DC handgun ban violated an individual s right under the Second Amendment to possess lawfully a firearm in his home for self defense In the 110th Congress pro gun Members of the House of Representatives who were dissatisfied with the District s response to the Heller decision passed a bill that would have further overturned provisions of the District s gun laws In the 111th Congress pro gun Members of the Senate amended the DC voting rights bill S 160 with language similar to the House bill described above and passed that bill on February 26 2009 Although the House leadership attempted to negotiate an end to the impasse over the District s gun laws and bring its version of the DC voting rights bill H R 157 to the floor this proposal has been tabled for the time being

Synchronization in Wireless Sensor Networks Erchin Serpedin, Qasim M. Chaudhari, 2009-07-30 Wireless sensor networks are set to play a key role in a wide range of civilian and military applications with tiny sensors connected through wireless links performing various sensing computing communication and control tasks in highly distributed systems This book presents a critical element in the deployment of wireless sensor networks the process of synchronization It summarizes the most important clock synchronization protocols proposed for wireless sensor networks with special emphasis placed on deriving efficient clock offset estimation schemes and performance benchmarks Graduate students of electrical and computer engineering and computer science will find this a valuable resource as will engineers who are interested in designing efficient clock synchronization algorithms and improving the performance of existing synchronization protocols
