Social And Environmental Impacts In The North Methods In Evaluation Of Socioeconomic And Environmental:

Social and Environmental Impacts in the North: Methods in Evaluation of Socio-Economic and Environmental Consequences of Mining and Energy Production in the Arctic and Sub-Arctic Rasmus Ole Rasmussen, Natalia E. Koroleva, 2012-10-23 Future development in the Arctic and Subarctic region requires careful attention to the possible consequences of the development activities themselves in relation to their environmental socioeconomic and cultural impacts A more thorough understanding of the impact of future activities however demands the dissemination and confrontation of results from different regions and different scientific traditions This requires scientific cooperation not only across disciplines but across border Primarily it requires both consensus and innovations in regard to methods This book confronts such differences in approaches and methods in relation to the analysis of socioeconomic and environmental consequences of large scale mineral and energy development activities in the Arctic and Subarctic establishing the common ground upon which future research activities can be based

Real-Time and Deliberative Decision Making Igor Linkov, Elizabeth A. Ferguson, Victor S. Magar, 2008-10-24 Decision making tools are needed to support environmental management in an increasingly global economy Addressing threats and identifying actions to mitigate those threats necessitates an understanding of the basic risk assessment paradigm and the tools of risk analysis to assess interpret and communicate risks It also requires modification of the risk paradigm itself to incorporate a complex array of quantitative and qualitative information that shapes the unique political and ecological challenges of different countries and regions around the world This book builds a foundation to characterize and assess a broad range of human and ecological stressors and risk management approaches to address those stressors using chemical risk assessment methods and multi criteria decision analysis tools Chapters discuss the current state of knowledge with regard to emerging stressors and risk management focusing on the adequacy of available systematic quantitative tools to guide vulnerability and threat assessments evaluate the consequences of different events and responses and support decision making This book opens a dialogue on aspects of risk assessment and decision analysis that apply to real time immediate and deliberative long term risk management processes
