A Theory of System Justification John T. Jost, 2020-07-14. Psychologist John Jost has spent decades researching poor people who vote for policies of inequality and women who think men deserve higher salaries. He argues that the persecuted often justify and defend the very social systems that oppress them because doing so serves a fundamental need for certainty, security, and social acceptance.

Social Psychology Karen A. Hegtvedt, Cathryn Johnson, 2017-07-12. Social Psychology: Individuals, Interaction, and Inequality invites you to take a sociological approach to the study of the individual in relationship to society. This unique new text explains how social psychology provides varied yet interrelated explanations for individuals' experiences in groups and how the micro-level interactions of individuals have consequences for macro-level phenomena within society. Karen A. Hegtvedt and Cathryn Johnson describe an array of processes that shape interaction given differences in status, power, or group memberships. Unlike other social psychology texts, theirs stresses the interconnections among these processes to create a story about how individuals perceive and then act in their social worlds. In addition to introducing the central theoretical approaches and important empirical studies, the authors also provide many examples that help students locate the substance of social psychology in their own experiences and social interactions. In the end, readers will gain an understanding of how their identities and perceptions shape what they do, how the structures in which they are embedded may constrain or facilitate their behaviors, and how these dynamics contribute to reinforcing or ameliorating inequalities in their social groups.

The ^ASocial Psychology of Collective Victimhood Johanna Ray Vollhardt, 2020-04-23. This book examines the social psychological processes involved in experiences of collective victimization and oppression, as well as the consequences of these experiences for individuals and for relations within and between groups. In twenty chapters, authors explore questions such as: How are experiences of collective victimization passed down and understood? How do people cope with and make sense of these experiences? Who is included and excluded from the category of victims and what are the psychological consequences of such denial versus acknowledgment of collective victimization? And finally, what are the ethics of researching collective victimization, especially when these experiences are recent or politically contested?

Judging Passions Roger Giner-Sorolla, 2013-03-01. Shortlisted for the British Psychological Society Book Award Academic Monograph category 2014. A CHOICE Outstanding Academic Title 2013. Psychological research shows that our emotions and feelings often guide the moral decisions we make about our own lives and the social groups to which we belong. But should we be concerned that our important moral judgments can be swayed by hot passions such as anger, disgust, guilt, shame, and sympathy? Aren't these feelings irrational and counterproductive? Using a functional conflict theory of emotions (FCT), Giner-Sorolla proposes that each emotion serves a number of different functions, sometimes inappropriately, and that moral emotions, in particular, are intimately tied to problems faced by the individuals in a group and by groups interacting with each other. Specifically, the author suggests that these emotions help us, as individuals and group members, to appraise developments in the environment, learn through association, regulate our own behavior, communicate convincingly with others. Drawing on extensive research, including many studies from the author's own lab, this book shows why emotions work to encourage reasonable moral behaviour and why they sometimes fail. This is the first single-authored volume in the field of psychology dedicated to a separate examination of the major moral and positive emotions. As such, the book is ideal reading for researchers, postgraduates, and undergraduates of social psychology, sociology, philosophy, and politics.

Envy Up, Scorn Down Susan T. Fiske, 2011-04-21 An insightful examination of why we compare ourselves to those above and below us The United States was founded on the principle of equal opportunity for all and this ethos continues to inform the nation s collective identity In reality however absolute equality is elusive The gap between rich

and poor has widened in recent decades and the United States has the highest level of economic inequality of any developed country. Social class and other differences in status reverberate throughout American life and prejudice based on another's perceived status persists among individuals and groups. In *Envy Up Scorn Down*, noted social psychologist Susan Fiske examines the psychological underpinnings of interpersonal and intergroup comparisons, exploring why we compare ourselves to those both above and below us and analyzing the social consequences of such comparisons in day to day life. What motivates individuals, groups and cultures to envy the status of some and scorn the status of others? Who experiences envy and scorn most? *Envy Up Scorn Down* marshals a wealth of recent psychological studies as well as findings based on years of Fiske's own research to address such questions. She shows that both envy and scorn have distinctive biological, emotional, cognitive and behavioral characteristics. And though we are all wired for comparison, some individuals are more vulnerable to these motives than others. Dominant personalities, for example, express envy toward high status groups such as the wealthy and well educated, and insecurity can lead others to scorn those perceived to have lower status such as women, minorities or the disabled. Fiske shows that one's race or ethnicity, gender and education all correlate with perceived status. Regardless of whether one is accorded higher or lower status, however, all groups rank their members and all societies rank the various groups within them. We rate each group as either friend or foe, able or unable, and accordingly assign them the traits of warmth or competence. The majority of groups in the United States are ranked either warm or competent, but not both, with extreme exceptions: the homeless or the very poor are considered neither warm nor competent. Societies across the globe view older people as warm but incompetent. Conversely, the very rich are generally considered cold but highly competent. *Envy Up Scorn Down* explores the nuances of status hierarchies and their consequences and shows that such prejudice in its most virulent form dehumanizes and can lead to devastating outcomes, from the scornful neglect of the homeless to the envious anger historically directed at Tutsis in Rwanda or Jews in Europe. Individuals, groups and even cultures will always make comparisons between and among themselves. *Envy Up Scorn Down* is an accessible and insightful examination of drives we all share and the prejudice that can accompany comparison. The book deftly shows that understanding envy and scorn and seeking to mitigate their effects can prove invaluable to our lives, our relationships and our society.

Psychology of Change Katherine J. Reynolds, Nyla R. Branscombe, 2014-11-20, Choice Recommended Read. This volume tackles the critical question of whether people change or whether they remain relatively constant across the lifespan. Much existing literature in psychology has largely endorsed the concept of stability. Indeed, in many people's minds, the person is understood to be set in stone as a function of early socialization and reaching a particular stage of development, evolutionary processes or traits that are hard-wired from the beginning by genes and biology. However, in recent years, important scientific developments in theory and research concerning the psychology of change have emerged. In contrast to the commonly held conception of the individual as fixed, this research illustrates how malleable people are, showing much behavioral plasticity. The chapters in this

volume written by scholars at the cutting edge of research into the psychology of change showcase these developments with the aim of advancing knowledge of the field and encouraging further research Topics addressed include brain function cognitive performance personality psychological well being collective action to achieve social change responses to life stressors and political change The message is clear the culture we live in what happens to us along the way and who we think we are and want to be can all change people
