project is the largest evaluation of effective group working methods in comparison to traditional teaching with findings that show raised levels of pupil achievement and a doubling of sustained active engagement in learning. The opening chapters present arguments regarding the relationship of social interaction and children's cognitive development and examine theories that explain why social interactional processes should be integrated into primary school pedagogic practices. Next, the book describes the conceptual and methodological basis for the SPRinG studies, especially its focus on the relational approach, the type of involvement of teachers and classroom planning. Further chapters present key results and describe the background and methods used to establish SPRinG-based effects on pupil progress in mathematics literacy and science, including both macro and micro assessments, how the SPRinG approach affected pupil-pupil interactions and teacher-pupil interactions as measured by systematic on-the-spot observations and analyses of videotapes of groups working on specially designed tasks, work and effects on pupil self-completed measures of motivation and attitudes to group work. The book also analyses reflections of teachers who have worked with SPRinG, moving from theory to practice, as well as adding insights associated with implementing SPRinG principles in schools. Drawing upon developmental psychological, social psychological, and classroom research, it develops a new and ambitious social pedagogic approach to classroom learning with a stress on group work, which will be of interest to researchers, teachers, and policy makers. This book includes contributions from Andrew Tolmie and Ed Baines, who were also involved in the ScotSPRinG and SPRinG projects.

professional development and academic courses It will be essential reading for all policy makers academics and others such as inspectors who critically examine leadership and management of educational institutions Every now and then a book is written in the field of leadership that stands out says something different is coherent original and makes us really ponder and think This is such a book it will provoke policy makers academics experienced practitioners and advanced students Cambridge Journal Education
