**Teaching Pupils with Severe and Complex Difficulties** Christopher Dyer, 2001 This book explores the principles that should guide teachers in meeting the educational needs of pupils with severe learning difficulties and relates these to effective classroom approaches It examines the special needs of these pupils from the inside out so that teachers understand the why as well as the how of education

**Transforming Nursery Education** Peter Moss, Helen Penn, 1996-03-28 This is an important publication which I urge colleagues to read and to consider carefully all the implications Early Years This provocative analysis with its clear examples is worth reading for its fresh look at where we could be headed come the 21st century Nursery Equipment Early childhood services in the UK have been badly neglected The consequences are serious chronic underfunding and increasing fragmentation most staff poorly paid and trained access often a matter of potluck and money low aspirations and even lower expectations Increasingly young children are seen as important for what they may become rather than for what they are and the case for early childhood services is made out in terms of later performance in school and adult life rather than the needs and rights of young children themselves No current political vision redresses this undervaluing of early childhood or addresses the parlous state our early childhood services are in Drawing on the rich early childhood tradition in the UK going back to Robert Owen and giving examples from current practice Transforming Nursery Education offers a critique of the status quo a vision of early childhood services and practical strategies for achieving it The book covers a wide range of day care and education services and critical issues such as staffing funding curriculum models of provision and the age at which

children start compulsory schooling Within this broad approach the book focuses in particular on the history and current practice of nursery education It argues that the present narrow approach to nursery education is neither appropriate to the needs of today nor inevitable It answers a critical question how can nursery education be transformed to play a leading role in the comprehensive integrated and coherent early childhood service that today s families really need *The Invention of Prophecy* Armin W. Geertz,2023-11-15 Armin Geertz corrects what he sees as basic American and European tendencies to misrepresent non Western cultures Carefully documenting the historical role of prophecy in Hopi Indian religion Geertz shows how prophecies about the end of the world have been created by the Hopi Traditionalist Movement and used by non Indian movements cults and interest groups Many of the seeming peculiarities of Hopi religion and culture have been invented he says by tourists novelists journalists and scholars and the millennial Traditionalist Movement has subtly co authored European and American stereotypes of Indians Geertz s richly detailed examples and persuasive arguments will be welcomed by all those interested in Native American studies comparative religions anthropology and sociology Armin Geertz corrects what he sees as basic American and European tendencies to misrepresent non Western cultures Carefully documenting the historical role of prophecy in Hopi Indian religion Geertz shows how prophecies about the end of the world have b From Monkey Brain to Human Brain Stanislas Dehaene,2005 Leaders in cognitive psychology comparative biology and neuroscience discuss patterns of convergence and divergence seen in studies of human and nonhuman primate brains The extraordinary overlap between human and chimpanzee genomes does not result in an equal overlap between human and chimpanzee thoughts sensations perceptions and emotions there are considerable similarities but also considerable differences between human and nonhuman primate brains From Monkey Brain to Human Brain uses the latest findings in cognitive psychology comparative biology and neuroscience to look at the complex patterns of convergence and divergence in primate cortical organization and function Several chapters examine the use of modern technologies to study primate brains analyzing the potentials and the limitations of neuroimaging as well as genetic and computational approaches These methods which can be applied identically across different species of primates help to highlight the paradox of nonlinear primate evolution the fact that major changes in brain size and functional complexity resulted from small changes in the genome Other chapters identify plausible analogs or homologs in nonhuman primates for such human cognitive functions as arithmetic reading theory of mind and altruism examine the role of parietofrontal circuits in the production and comprehension of actions analyze the contributions of the prefrontal and cingulate cortices to cognitive control and explore to what extent visual recognition and visual attention are related in humans and other primates The Fyssen Foundation is dedicated to encouraging scientific inquiry into the cognitive mechanisms that underlie animal and human behavior and has long sponsored symposia on topics of central importance to the cognitive sciences **Current Catalog** National Library of Medicine (U.S.), First multi year cumulation covers six years 1965 70 **National Library of Medicine Current Catalog**

Document Supply Centre,1986 *Disrupting Corporate Culture* David G. White, Jr,2020-08-17 Research in cognitive science over the last 30 years shows much of what we know about culture in the business world is based on myth wishful thinking outdated science or is just plain wrong This is why culture shaping and change programs in organizations often amount to little more than sloganeering with minimal impact on the lived experience of employees This book bridges the gap between the latest research on cognitive science and culture providing a valuable guide for change leaders CEOs and practitioners on how to sustainably work with and change this important resource It answers many of the major questions that have plagued culture work such as Why so many CEOs and management consultants preach culture change when so few culture interventions actually succeed Why CEOs persist in believing culture starts at the top when virtually no research in anthropology supports that claim Why most culture shaping approaches have no answer for how to affect culture in global companies Why culture doesn't cause us to do anything yet we persist in believing that somehow it does Why so many culture shaping projects focus on corporate values despite the fact modern science shows why changing personal values is exceedingly difficult What we are learning about culture from the last 30 years of cognitive science gives us the foundation for far more impactful and sustainable interventions than have been possible to date This book explains why showing how everyday business practices well beyond HR are key to culture change Why Because the brain's synaptic plasticity can only be altered through new sustained and widespread organizational habits and routines This groundbreaking practical guide will show you finally how to realize the full power of culture as a transformational empowering and competitive resource **Books in Series, 1876-1949** R.R. Bowker Company,1982 *Perspectives on Intellectual Development* Marion Perlmutter,1986 First published in 1986 Routledge is an imprint of Taylor Francis an informa company **Judaic Technologies of the Word** Gabriel Levy,2014-10-14 Judaic Technologies of the Word argues that Judaism does not exist in an abstract space of reflection Rather it exists both in artifacts of the material world such as texts and in the bodies brains hearts and minds of individual people More than this Judaic bodies and texts both oral and written connect and feed back on one another Judaic Technologies of the Word examines how technologies of literacy interact with bodies and minds over time The emergence of literacy is now understood to be a decisive factor in religious history and is central to the transformations that took place in the ancient Near East in the first millennium BCE This study employs insights from the cognitive sciences to pursue a deep history of Judaism one in which the distinctions between biology and culture begin to disappear *Em busca de uma pedagogia da igualdade* ,1995 *Towards an embodied science of intersubjectivity: Widening the scope of social understanding research* Ezequiel Di Paolo,Hanne De Jaegher,2015-06-16 An important amount of research effort in psychology and neuroscience over the past decades has

focused on the problem of social cognition This problem is understood as how we figure out other minds relying only on indirect manifestations of other people s intentional states which are assumed to be hidden private and internal Research on this question has mostly investigated how individual cognitive mechanisms achieve this task A shift in the internalist assumptions regarding intentional states has expanded the research focus with hypotheses that explore the role of interactive phenomena and interpersonal histories and their implications for understanding individual cognitive processes This interactive expansion of the conceptual and methodological toolkit for investigating social cognition we now propose can be followed by an expansion into wider and deeply related research questions beyond but including that of social cognition narrowly construed Our social lives are populated by different kinds of cognitive and affective phenomena that are related to but not exhausted by the question of how we figure out other minds These phenomena include acting and perceiving together verbal and non verbal engagement experiences of dis connection management of relations in a group joint meaning making intimacy trust conflict negotiation asymmetric relations material mediation of social interaction collective action contextual engagement with socio cultural norms structures and roles etc These phenomena are often characterized by a strong participation by the cognitive agent in contrast with the spectatorial stance typical of social cognition research We use the broader notion of embodied intersubjectivity to refer to this wider set of phenomena This Research Topic aims to investigate relations between these different issues to help lay strong foundations for a science of intersubjectivity the social mind writ large To contribute to this goal we encouraged contributions in psychology neuroscience psychopathology philosophy and cognitive science that address this wider scope of intersubjectivity by extending the range of explanatory factors from purely individual to interactive from observational to participatory *Psychiatry* ,1986 **The British Library General Catalogue of Printed Books, 1986 to 1987** British Library,1988
