Habicht-Mauche, Suzanne L. Eckert, Deborah L. Huntley, 2022-09-06 The demographic upheavals that altered the social landscape of the Southwest from the thirteenth through the seventeenth centuries forced peoples from diverse backgrounds to literally remake their worlds transformations in community identity and power that are only beginning to be understood through innovations in decorated ceramics In addition to aesthetic changes that included new color schemes new painting techniques alterations in design and a greater emphasis on iconographic imagery some of the wares reflect a new production efficiency resulting from more specialized household and community based industries Also they were traded over longer distances and were used more often in public ceremonies than earlier ceramic types Through the study of glaze painted pottery archaeologists are beginning to understand that pots had social lives in this changing world and that careful reconstruction of the social lives of pots can help us understand the social lives of Puebloan peoples In this book fifteen contributors apply a wide range of technological and stylistic analysis techniques to pottery of the Rio Grande and Western Pueblo areas to show what it reveals about inter and intra community dynamics work groups migration trade and ideology in the precontact and early postcontact Puebloan world The contributors report on research conducted throughout the glaze producing areas of the Southwest and cover the full historical range of glaze ware production Utilizing a variety of techniques continued typological analyses optical petrography instrumental neutron activation analysis X ray microprobe analysis and inductively coupled plasma mass spectroscopy they develop broader frameworks for examining the changing role of these ceramics in social dynamics By tracing the circulation and exchange of specialized knowledge raw materials and the pots themselves via social networks of varying size they show how glaze ware technology production exchange and reflected a variety of dynamic historical and social processes Through this material evidence the contributors reveal that technological and aesthetic innovations were deliberately manipulated and disseminated to actively construct communities of practice that cut across language and settlement groups The Social Life of Pots offers a wealth of new data

from this crucial period of prehistory and is an important baseline for future work in this area Contributors Patricia Capone Linda S Cordell Suzanne L Eckert Thomas R Fenn Judith A Habicht Mauche Cynthia L Herhahn Maren Hopkins Deborah L Huntley Toni S Laumbach Kathryn Leonard Barbara J Mills Kit Nelson Gregson Schachner Miriam T Stark Scott Van Keuren

Craft Production and Social Change in Northern China Anne P. Underhill, 2012-12-06 This book offers an anthropological analysis of how craft production changed in relation to the development of complex societies in northern China It focuses on the production and use of food containers pottery and bronze vessels during the late prehistoric and early historic periods A major theme is how production and use of prestige vessels changed in relation to increase in degree of social inequality The research and writing of this book took place intermittently over a period of several years When I first outlined the book in 1994 I planned to offer a more limited and descriptive account of social change during the late prehistoric period In considering the human desire to display status with prestige goods my initial approach emphasized how the case of northern China was similar to other areas of the world I began to realize that in order to adequately explain how and why craft production changed in ancient China it was crucial to consider the belief systems that motivated production and use of food containers Similarly a striking characteristic of ancient China that I needed to include in the analysis was the preponderance of food containers rather than other goods that were buried with the deceased I decided to investigate the social and ritual uses of food beverages and containers during more than one period of Chinese history Some strong patterns could have emerged during the late prehistoric period

Aspects of Empire in Achaemenid Sardis Elspeth R. M. Dussinberre, 2003-04-10 Elspeth R. M. Dussinberre proposes a fresh approach to understanding the Achaemenid Empire based on her study of the regional capital Sardis. This study uses archaeological, artistic, and textual sources to demonstrate that the two hundred year Persian presence in this city had a profound impact on local social structures, revealing the region's successful absorption both ideologically and physically into the Persian Empire. During this period, Sardis was a centre of burgeoning creativity and vitality where a polyethnic elite devised a fresh culture inspired by Iranian, Greek, and local Lydian traditions that drew on and legitimated imperial ideology. The non-elite absorbed and adapted multiple aspects of this culture to create a wholly different profile of what it meant to be Sardian. As well as successfully bringing together information on the Achaemenids, this book is also an excellent contribution to empire studies.

The Making of Empire in Bronze Age Anatolia Claudia Glatz, 2020-11-12 In this book, Claudia Glatz reconsiders the concept of empire and the processes of imperial making and undoing of the Hittite network in Late Bronze Age Anatolia. Using an array of archaeological, iconographic, and textual sources, she offers a fresh account of one of the earliest well-attested imperialist polities of the ancient Near East. Glatz critically examines the complexity and ever-transforming nature of imperial relationships and the practices through which Hittite elites and administrators aimed to bind disparate communities and achieve a measure of sovereignty in particular places and landscapes. She also tracks the ambiguities inherent in these practices: what they did or did not achieve, how they were resisted, and how they were subtly negotiated in different regional and cultural contexts.

Empire, Authority, and Autonomy in Achaemenid Anatolia Elspeth R. M. Dussinberre, 2013-04-29 The Achaemenid Persian Empire (550-330 BCE) was a vast and complex sociopolitical structure that encompassed much of modern-day Turkey, Syria, Jordan, Israel, Egypt, Iraq, Iran, and Afghanistan and included two dozen distinct peoples who spoke different languages, worshipped different deities, lived in different environments, and had widely differing social customs. This book offers a radical new approach to understanding the Achaemenid Persian Empire and imperialism more generally. Through a wide array of textual, visual, and archaeological material, Elspeth R. M. Dussinberre shows how the rulers of the Empire constructed a system flexible enough to provide for the needs of different peoples within the confines of a single imperial authority and highlights the variability in response. This book examines the dynamic tensions between authority and autonomy across the Empire, providing a valuable new way of considering imperial structure and development.
