Sullivan,1995 *The Social Organization of South Asian Immigrant Women's Mothering Work* Ferzana Chaze,2018-10-01

This book examines the social organization of recent immigrant South Asian women s mothering work It explicates the processes that contribute to those belonging to this social group making changes to their mothering work after immigrating to Canada despite having reservations about doing so The book draws its findings from interviews with 20 South Asian immigrant mothers who were raising school aged children in Canada and had been in the country for less than five years Government policies websites and newspaper reports also form important data sources for this study Using institutional ethnography the book shows the disjuncture between the mothering work of the South Asian immigrant woman and institutionally backed neoliberal discourses in Canada around mothering schooling and immigrant employment It highlights the manner in which the settlement experiences for South Asian immigrant women can become stressful and complicated by the changes that these women are required to make in line with these institutional discourses The study explicates how the work of immigrant mother in the settlement process changes over time as she participates in social relations that require her to raise her children as autonomous responsible citizens who can participate in a neoliberal economy characterised by precarious work The research that informs this book has implications for the social work profession which is connected in many ways to the settlement experiences of immigrant women **Social Organization** W.J. Hedges,Barbara Schneider,2005-05-26 Schools are complex social settings where students teachers administrators and parents interact to shape a child s educational experience Any effort to improve educational outcomes for America s children requires a dynamic understanding of the environments in which children learn In The Social Organization of Schooling editors Larry Hedges and Barbara Schneider assemble researchers from the fields of education organizational

theory and sociology to provide a new framework for understanding and analyzing America's schools and the many challenges they face. The Social Organization of Schooling closely examines the varied components that make up a school's social environment. Contributors Adam Gamoran, Ramona Gunter, and Tona Williams focus on the social organization of teaching. Using intensive case studies, they show how positive professional relations among teachers contribute to greater collaboration, the dissemination of effective teaching practices, and ultimately a better learning environment for children. Children learn more from better teachers, but those best equipped to teach often opt for professions with higher social stature, such as law or medicine. In his chapter, Robert Dreeben calls for the establishment of universal principles and practices to define good teaching, arguing that such standards are necessary to legitimize teaching as a high status profession. The Social Organization of Schooling also looks at how social norms in schools are shaped and reinforced by interactions among teachers and students. Sociologist Maureen Hallinan shows that students who are challenged intellectually and accepted socially are more likely to embrace school norms and accept responsibility for their own actions. Using classroom observations, surveys, and school records, Daniel McFarland finds that group-based classroom activities are effective tools in promoting both social and scholastic development in adolescents. The Social Organization of Schooling also addresses educational reforms and the way they affect a school's social structures. Examining how testing policies affect children's opportunities to learn, Chandra Muller and Kathryn Schiller find that policies which increased school accountability boosted student enrollment in math courses, reflecting a shift in the school culture towards higher standards. Employing a variety of analytical methods, The Social Organization of Schooling provides a sound understanding of the social mechanisms at work in our educational system. This important volume brings a fresh perspective to the many ongoing debates in education policy and is essential reading for anyone concerned with the future of America's children.

Work, Self and Society Catherine Casey, 2013-01-11. Despite recent interest in the effects of restructuring and redesigning the work place, the link between individual identity and structural change has usually been asserted rather than demonstrated. Through an extensive review of data from field work in a multi-national corporation, Catherine Casey changes this. She knows that changes currently occurring in the world of work are part of the vast social and cultural changes that are challenging the assumptions of modern industrialism. These events affect what people do everyday and they are altering relations among ourselves and with the physical world. This valuable book is not only a critical analysis of the transformations occurring in the world of work but an exploration of the effects of contemporary practices of work on the self.

Social Organizations and the Authoritarian State in China Timothy Hildebrandt, 2013-02-18. Received wisdom suggests that social organizations such as non-government organizations (NGOs) have the power to upend the political status quo. However, in many authoritarian contexts such as China, NGO emergence has not resulted in this expected regime change. In this book, Timothy Hildebrandt shows how NGOs adapt to the changing interests of central and local governments working in service of the state to address

social problems In doing so the nature of NGO emergence in China effectively strengthens the state rather than weakens it This book offers a groundbreaking comparative analysis of Chinese social organizations across the country in three different issue areas environmental protection HIV AIDS prevention and gay and lesbian rights It suggests a new way of thinking about state society relations in authoritarian countries one that is distinctly co dependent in nature governments require the assistance of NGOs to govern while NGOs need governments to extend political economic and personal opportunities to exist

Vicente,1999-04-01 This book describes for the first time in pedagogical form an approach to computer based work in complex sociotechnical systems developed over the last 30 years by Jens Rasmussen and his colleagues at Ris National Laboratory in Roskilde Denmark This approach is represented by a framework called cognitive work analysis Its goal is to help designers of complex sociotechnical systems create computer based information support that helps workers adapt to the unexpected and changing demands of their jobs In short cognitive work analysis is about designing for adaptation The book is divided into four parts Part I provides a motivation by introducing three themes that tie the book together safety productivity and worker health The ecological approach that serves as the conceptual basis behind the book is also described In addition a glossary of terms is provided Part II situates the ideas in the book in a broader intellectual context by reviewing alternative approaches to work analysis The limitations of normative and descriptive approaches are outlined and the rationale behind the formative approach advocated in this book is explored Part III describes the concepts that comprise the cognitive work analysis framework in detail Each concept is illustrated by a case study and the implications of the framework for design and research are illustrated by example Part IV unifies the themes of safety productivity and health and shows why the need for the concepts in this book will only increase in the future In addition a historical addendum briefly describes the origins of the ideas described in the book **Crime and Social**

Organization Elin Waring,David Weisburd,2018-02-06 This tenth volume in the Advances in Criminological Theory series is dedicated to the work of Albert J Reiss Jr It focuses on the relationship between crime and social organization that is so central to his work This focus rejects a view of crime solely as the action of atomistic individuals and sees the criminal justice system as inseparable from its social political and organizational context This perspective has had a resurgence in recent years and this volume brings together some of the most important scholars who have contributed to these developments Articles examine the social organization of crime itself the context of crime and the response to crime The concept of co offending originally developed by Reiss is explored both as a way of improving understanding of juvenile offending and as a framework for understanding patterns of criminal organization across crime types and the relationship of criminal to licit

organization Other articles recast social disorganization theory in light of recent theoretical and empirical developments They argue for a version of control theory that incorporates internal contextual and state focused dimensions Organizational actors both as offenders and as governmental agencies responding to crime are explored Building from Reiss's groundbreaking work on policing a group of articles on policing examine organizational change through reorganization the adoption of strategies such as community policing and the increased use of empirical evidence complicated by routines organizational culture and political constraints Taken together these works develop new connections between dimensions of social organization and renew the social organization perspective on crime and criminal justice Contributors include Diane Vaughan Joan McCord Kevin P Conway Elin Waring Felton Earls Beat Mohler Peter Manning Stephen Mastrofski Lawrence Sherman David Weisburd Robert Sampson David F Greenberg Margaret Kelley Robin Tamarelli and Jeremy Travis
