## **Social Security Household And Family Dynamics In Aging Societies:**

**Social Security, Household, and Family Dynamics in Ageing Societies** Jean-Pierre Gonnot, Nico Keilman, Christopher Prinz, 2012-12-06 Many industrialized countries are facing large problems with their public pension systems in the 21st century An unfavourable age distribution with lower population shares in working ages and increasing shares and numbers of elderly persons in the future will lead under current pension systems to a drop in contributions and at the same time to sharply rising amounts of benefits paid This book analyzes the impact of dynamics in age structure and marital status composition on future public pension expenditures in twelve industrialized countries It shows that there is no demographic response to population ageing at the horizon 2030 Neither an increase in fertility nor an inflow of migrants can rejuvenate national populations unless fertility and or migration reach unrealistically high levels Therefore the overall conclusion of this book is that demographic variables are of limited help to relieve the burden of future public pension expenditures Substantial reductions of the public pension burden have to be sought in socioeconomic measures and not in adjusting demographic conditions The book includes various demographic and pension scenarios for pension costs in the coming decades for Austria Canada the Czech and Slovak Republics Finland France Germany Hungary Italy the Netherlands Norway Poland and Sweden Not only old age pensions but also disability and survivor pensions have been investigated Variant projections were calculated for changes in demographic labour force and pension system variables In addition separate case studies for three countries deal with a pension system in Austria in which benefits depend on the number children ever born the impact of household dynamics on social security in the Netherlands not just marriage and marriage dissolution and with the consequences of economic growth for public pensions in Sweden

**The Oxford Handbook of Retirement** Mo Wang, 2013 This handbook reviews existing theoretical perspectives and research findings on retirement explores current and future challenges in retirement research and practice and provides corresponding recommendations and suggestions

**The Family, the Market or the State?** Gustavo De Santis, 2012-06-19 This book touches upon a few of the major challenges that all modern societies will have to face in the near future how to set up a resilient pay as you go pension system whether the current balance between expenses and revenues in social expenditure is viable in the future and if not what changes need to be introduced whether the relative well being of the current and future cohorts of the old will be preserved and how their standards of living compare to those experienced by the old in the recent past At the micro level the exchanges between generations are presented and discussed in detail how they have evolved in the recent past in terms of time money co residence and proximity and what will likely happen next The geographical scope is on the developed countries plus South Korea A rich documentation of tables and graphs supports the scientific analyses and the policy implications in each of the nine chapters of this book where demography sociology and economics intersect fruitfully both at the macro and at the micro level

**The Future Population of the World** Wolfgang Lutz, 2013-11-05 The highly acclaimed

The Future Population of the World contains the most authoritative assessment available of the extent to which population is likely to grow over the next 50 to 100 years The book provides a thorough analysis of all the components of population change and translates these factors into a series of projections for the population of the world's regions This revised and updated version incorporates completely new scenario projections based on updating starting values and revised assumptions plus several methodological improvements It also contains the best currently available information on global trends in AIDS mortality and the first ever fully probabilistic world population projections The projections given up to 2100 add important additional features to those of the UN and the World Bank they show the impacts of alternative assumptions for all three components mortality and migration as well as fertility they explicitly take into account possible environmental limits to growth and for the first time they define confidence levels for global populations Combining methodological innovation with overviews of the most recent data and literature this updated edition of The Future Population of the World is sure to conform its reputation as the most comprehensive and essential publication in the field

*Future Elderly Living Conditions in Europe* Joëlle Gaymu, 2008 In FELICIE the focus is on the health of the elderly and on the resources at their disposal to cope with the severe impairments liable to affect their quality of life Not only personal resources economic well being and educational attainment but also the potential support of close kin i.e. their partner of course and their children if available This leads to the more specific question of care One major conclusion of the FELICIE study is that the disabled older adults of the future will fare better on average than those of today both on a personal level thanks to higher levels of education and on a social level thanks to the more frequent presence of their spouse and at least potentially their children The conclusions are based on the experience of nine countries across Europe north Finland Netherlands west Belgium France Germany United Kingdom south Italy Portugal east Czech Republic In terms of both demographic and social indicators the participating countries are fairly representative of their region

*Analytical Family Demography* Robert Schoen, 2018-09-12 In this book new mathematical and statistical techniques that permit more sophisticated analysis are refined and applied to questions of current concern in order to understand the forces that are driving the recent dramatic changes in family patterns The areas examined include the impact of the evolving Second Demographic Transition where complex patterns of gender dynamics and social change are re orienting family life New

analyses of marriage cohabitation union dynamics and union dissolution provide a fresh look at the changing family life cycle emerging patterns of partner choice and the impact of union dissolution on the life course The demography of kinship is explored and the importance of parity progression to the generation of the kinship web is highlighted The methodology of population projections by family status is examined and new results presented that demonstrate how recognizing family status advances long term policy objectives especially with regard to children and the elderly This book applies up to date methods to examine the demography of the family and will be of value to sociologists demographers and all those who are interested in the family *Integrated Policies on Gender Relations, Ageing and Migration in Europe* Dragana Avramov, R. L. Cliquet, 2005

**Welfare in an Idle Society?** Bernd Marin, 2017-10-24 The modern welfare state is indeed one of the greatest achievements of the post war 20th century With its key aims of eradicating the five giant social ills of Want Ignorance Disease Squalor and Idleness it aimed to providing a minimum standard of living with all people of working age paying a weekly contribution in return benefits would be paid to anyone who was sick unemployed retired or widowed The modern welfare state therefore is about maintaining a delicate equilibrium between dependent social groups on the one hand and the active working classes on the other In the case of old age security this balance is being achieved or not by the so called Generation Contract This social pact is more of an implicit unwritten and unspecified social contract This ground breaking book demonstrates how countries are addressing population ageing challenges in depth using the case study of Austria to gain the required complexity and differentiation in a comparative European framework of empirical evidence This is a broad social science study in political economy and sociology not an economic analysis Though focusing on pensions it centres on the im balance between work and non work issues of health work ability employability and benefit receipt from old age security to disability allowance It will be required reading for all sociologists and social policy experts and academics working within this area

**Population Issues** Leo J.G. van Wissen, Pearl A. Dykstra, 2012-12-06 This volume marks the end of an eight year program of research on population issues launched in 1990 by the Netherlands Organization for Scientific Research The NWO Priority Program on Population Issues Initiatives for this program of research were taken over ten years ago by Hans Van Ginkel who became the first program chair and Dirk Van De Kaa The Dutch community of population scientists is deeply indebted to them for their early efforts At the time the program carried the name Between Individual Development and Social Solidarity Population and Society in a Period of Transition The goals of the Priority Program were threefold To reduce the fragmentation of research on population issues to increase collaboration among population researchers with different disciplinary backgrounds and to strengthen the position of population studies in Dutch academe and in international forums Looking back over eight years of programmed research we can safely say that the Priority Program has given an enormous impetus to population research in the Netherlands as this volume attests This program of research could not have been carried out successfully without the valuable contributions and constructive input of a large group of

scientists The scope and the focus of the Priority Program were defined by a preparatory committee chaired by Gerard Frinking

A Sociology of Family Life Deborah Chambers, Pablo Gracia, 2021-11-30 Family relations are undergoing dramatic changes globally and locally At the same time certain features of family life endure This popular book now in a fully updated second edition presents a comprehensive assessment of recent research on family parenting childhood and interpersonal ties A Sociology of Family Life queries assumptions about a disintegration of the family by revealing a remarkable persistence of commitment and reciprocity across cultures within new as well as traditional family forms Yet while new kinds of intimate relationships such as friends as family and LGBTQ intimacies become commonplace such personal relationships can still be difficult to negotiate in the face of wider structural norms With a focus on factors such as class gender race ethnicity and sexuality this new edition highlights inequalities that influence and curb families and personal life transnationally Alongside substantial new material on cultural and digital transformations the book features extensive updates on issues ranging from demography migration ageing and government policies to reproductive technologies employment and care With a global focus and blending theory with real life examples this insightful and engaging book will remain indispensable to students across the social sciences
