Ottoman Explorations of the Nile Robert Dankoff, Nuran Tezcan, Michael D. Sheridan, 2018-02-15 Before the time of Napoleon the most ambitious effort to explore and map the Nile was undertaken by the Ottomans as attested by two monumental documents an elaborate map with 475 rubrics and a lengthy travel account Both were achieved at about the same time c 1685 and both by the same man Evliya elebi's account of his Nile journeys in the tenth volume of his Book of Travels Seyahatname has been known to the scholarly world since 1938 when that volume was first published The map held in the Vatican Library has been studied since at least 1949 Numerous new critical editions of both the map and the text have been published over the years each expounding upon the last in an attempt to reach a definitive version The Ottoman Explorations of the Nile provides a more accurate translation of the original travel account Furthermore the maps themselves are reproduced in greater detail and vivid color and there are more cross references to the text than in any previous edition This volume gives equal weight and attention to the two parts that make up this extraordinary historical document allowing readers to study the map or the text independently while also using each to elucidate and accentuate the details of the other

special features and a completely revised and robust companion reader this major revision makes the past memorable and accessible for a new generation of students and instructors Across Cultural Borders Eckhardt Fuchs, Benedikt Stuchtey, 2002 This innovative work offers the first comprehensive transcultural history of historiography The contributors transcend a Eurocentric approach not only in terms of the individual historiographies they assess but also in the methodologies they use for comparative analysis Moving beyond the traditional national focus of historiography the book offers a genuinely comparative consideration of the commonalities and differences in writing history Distinguishing among distinct cultural identities the contributors consider the ways and means of intellectual transfers and assess the strength of local historiographical traditions as they are challenged from outside The essays explore the question of the utility and the limits of conceptions of modernism that apply Western theories of development to non Western cultures Warning against the dominant tendency in recent historiographies of non Western societies to define these predominantly in relation to Western thought the authors show the extent to which indigenous traditions have been overlooked The key question is how the triad of industrialization modernization and the historicization process which was decisive in the development of modern academic historiography also is valid beyond Europe Illustrating just how deeply suffused history writing is with European models the book offers a broad theoretical platform for exploring the value and necessity of a world historiography beyond Eurocentrism

Geographical Knowledge and Imperial Culture in the Early Modern Ottoman Empire Pinar Emiralioğlu, 2016-12-05 Exploring the reasons for a flurry of geographical works in the Ottoman Empire in the sixteenth century this study analyzes how cartographers travellers astrologers historians and naval captains promoted their vision of the world and the centrality of the Ottoman Empire in it It proposes a new case study for the interconnections among empires in the period demonstrating how the Ottoman Empire shared political cultural economic and even religious conceptual frameworks with contemporary and previous world empires The Oxford Handbook of Early Modern European History, 1350-1750 Hamish Scott, 2015-07-23 This Handbook re examines the concept of early modern history in a European and global context The term early modern has been familiar especially in Anglophone scholarship for four decades and is securely established in teaching research and scholarly publishing More recently however the unity implied in the notion has fragmented while the usefulness and even the validity of the term and the historical periodisation which it incorporates have been questioned The Oxford Handbook of Early Modern European History 1350 1750 provides an account of the development of the subject during the past half century but primarily offers an integrated and comprehensive survey of present knowledge together with some suggestions as to how the field is developing It aims both to interrogate the notion of early modernity itself and to survey early modern Europe as an established field of study The overriding aim will be to establish that early modern is not simply a chronological label but possesses a substantive integrity Volume I examines Peoples and Place assessing structural factors such as climate printing and the revolution in information social and economic developments and religion including chapters

extraordinary flowering of Viennese culture between the two world wars His masterpiece A Cultural History of the Modern Age demonstrates the intellectual universality that Friedell saw as guarantor of the continuity and regeneration of European civilization Following a brilliant opening essay on cultural history and why it should be studied the first volume begins with an analysis of the transformation of the Medieval mind as it evolved from the Black Death to the Thirty Years War The emphasis is on the spiritual and cultural vortex of civilization but Friedell never forgets the European roots in pestilence death and superstition that animate a contrary drive toward reason refinement intellectual curiosity and scientific knowledge While these values reached their apogee during the Renaissance Friedell shows that each cultural victory is precarious and Europe was always in danger of slipping back into barbarism Friedell s historical vision embraces the whole of Western culture and its development It is a consistent probing for the divine in the world s course and is therefore theology it is research into the basic forces of the human soul and is therefore psychology it is the most illuminating presentation of the forms of state and society and therefore is politics the most varied collection of all art creations and is therefore aesthetics Thomas Mann regarded Friedell as one of the great stylists in the German language Like the works of the great novelist A Cultural History of the Modern Age offers a dramatic history of the last six centuries showing the driving forces of each age The new introduction provides a fascinating biographical sketch of Friedell and his cultural milieu and analyzes his place in intellectual history
