homogenizing assumptions of conventional economics and open up scope for more sophisticated reflections on Cuban

the most successful case of science and technology policy in the country s economic history The book takes an  
interdisciplinary approach exploring issues such as interdependency purpose and history as natural constituencies of the  
innovation process It also examines the dynamic and crucial role played by the state in the formation of innovative business  
enterprises This book will be of interest to academic researchers in the fields of innovation and economic development
