comprehensively structure our thinking about developmental theory The constructive contribution Piaget s theory has for developmental theory emerges as four central themes in the volume understanding the intentional or semantic aspect of mental life without abandoning the Piagetian assumption that is rational and committed to truth testing examining mental life and its development as a dialectical relation of function and structure a relation Piaget introduced in his study of the developmental relation between procedural and operational knowledge exploring new and interdisciplinary perspectives on equilibration as the driving force of constructive adaptive processes understanding social and historical forces in individual and cultural development not necessarily as forces antithetical to Piaget s perspective but as forces that take on new meaning within his framework which avoids erroneous dichotomies such as the distinction between subjective and objective knowledge
