Story Of Apollo II:

Race to the Moon Jen Green, 1999-03-01 Describes the events leading up to the Apollo 11 flight that put the first man on the moon and the technological advances that made this and later flights possible *The First Men on the Moon* David M. Harland, 2007-10-14 On 12 April 1961 Yuri Gagarin became the first man to orbit the Earth One month later President John F Kennedy challenged the American nation to land a man on the Moon before the decade was out On 16 July 1969 Neil Armstrong Michael Collins and Buzz Aldrin set off in Apollo 11 to attempt this audacious mission and succeeded magnificently This book tells the story of Apollo 11 starting with crew selection and training the choice of the landing site and the assembly of the space vehicle then a detailed account of the mission featuring the lunar landing and moonwalk and a review of how our knowledge of the Moon s history was revolutionised as a result The story is enlivened by dialogue between the astronauts in space and the flight controllers in Mission Control The Story of Apollo II R. Conrad Stein, 1985-10-01 Highlights man s efforts to journey to the moon with a detailed account of the first landing achieved by Apollo 11 **The Story of Apollo 11** R. work back on Earth to get America to the Moon on July 20 1969 A veteran space reporter with a vibrant touch nearly every sentence has a fact an insight a colorful quote or part of a piquant anecdote The Wall Street Journal and in One Giant Leap Fishman has written the sweeping definitive behind the scenes account of the furious race to complete one of mankind's greatest achievements It's a story filled with surprises from the item the astronauts almost forgot to take with them the American flag to the extraordinary impact Apollo would have back on Earth and on the way we live today From the research labs of MIT where the eccentric and legendary pioneer Charles Draper created the tools to fly the Apollo spaceships to the factories where dozens of women sewed spacesuits parachutes and even computer hardware by hand Fishman captures the exceptional feats of these ordinary Americans It's been 50 years since Neil Armstrong took that one small step Fishman explains in dazzling form just how unbelievable it actually was Newsweek
