

The background of the entire image is a dense, overlapping collage of various international banknotes. The colors range from warm tones like reds, oranges, and yellows at the top to cooler tones like blues and greens at the bottom. The banknotes are slightly wavy and layered, creating a sense of depth and texture. A dark grey rectangular box is centered over the middle of the image, containing the title and authors' names.

Strained Relations:

Philippine Law on Torts and Damages J. Cezar S. Sangco, 1993 Grimké on the Christian Life Drew Martin, 2025-03-24

Francis J. Grimké's Vision of the Christian Life Francis Grimké's life left a significant mark on American Christianity at the turn of the 20th century. Born enslaved in South Carolina, Grimké dedicated his life to teaching and preaching the gospel and confronting the racism and injustice of his time. For 50 years, he served as a Presbyterian pastor in Washington, DC, emerging as a prominent leader in the early civil rights movement. This book explores Grimké's vision of the Christian life, emphasizing his beliefs on personal piety, family, the mission of the church, and the relationship between faith and politics. His blend of doctrinal integrity and social concern helps readers wisely engage in topics like race, ethnicity, culture, and politics in the church today. As the church continues to navigate these polarized issues, Grimké reminds us that through Christ, unity is possible.

Part of the Theologians on the Christian Life Series, this book provides accessible introductions to some of church history's greatest teachers. Contemporary Application helps individuals address issues such as race, ethnicity, culture, and politics within the church today. Academic yet Accessible. For those interested in practical theology and the intersection between Christian faith, race, and politics.

Understanding Relations - The Vedic Astrology Way ALKA VIJH, 2012-11-15. This book is about understanding equations of relationships with the help of Vedic Astrology. One cannot ignore the importance of relationships in life and always desires to be loved and respected by others. The book gives an approach for making relationships better if one understands the potential of planets in the birth chart. By understanding the weak and strong points in the chart, one can mould himself accordingly and move in the right direction to get the desired result and improve his relationships and living. In each chapter, the converse charts are taken to describe the events; however, it is advisable that no prediction should be made by studying the charts on the surface only. All factors should be taken into consideration while predicting an event, and the reading should be done by a scientific approach only. A special chapter in the beginning is given for the reader to make him understand the terminology and its role in understanding the chart, which will then enable him to understand and improve his relations via Vedic Astrology easily. Though the calculative part has been explicitly ignored to make reading easy, the combinations, the in-depth analysis, and use of simple tools, the use of converse charts, and their analysis will stimulate the mind for deep study and make it interesting for all. Each chapter is supported with suitable examples. All cases taken are genuine and supported by real incidents. The book is a result of some authentic research done by the author over the years.

Kelley,2017-05-02 This book shows that despite lacking traditional force public grades can motivate countries to focus on problems they would rather ignore **Suicide And Attempted Suicide** Dr. C.G. Deshpande,2020-12-23 Suicide is a topic that invariably shocks and saddens any heart We the Behavioural Scientists often are so helpless and cannot prevent all suicides As in the developed countries the rate of suicide has gone up along with socioeconomical development and urbanisation in this country The status race D Morris leaves many of us frustrated and subsequently aggressive west If this drive cannot be externalized it is internalised causing suicidal behaviour Dr C G Deshpande s monograph on suicides has come at the right time to awaken social scientists to this rude challenge posed by the spectre of suicidal death He has painstakingly conducted a controlled and statistically validated study of the Epidemeology Aetiopathology Classification management and prevention of suicidal behaviour His elaborate overview of the previous studies by researchers and experts like Durkheim W Breed Gibbs and Martin Pretzel West J Jacobs and Fendell as well as learned observations by authorities like Freud Jung Adler K Horney and Sullivan is very informative Dr Deshpande has further detailed the various aspects of suicidal phenomena its history the cross cultural aspects and types of suicide and its clasification by karl Menninger klopfer and Schneidman The various methods of study such as psychodiagnostic testing analysis of suicide notes and relationship with the different factors that influence suicidalbehaviour viz Age sex differences culture home environment neurochemicals etc are described along with his studied comments In chapter 3 4 and 5 he has explained the methodology and findings of his research study along with elaborate explanations and analysis of findings especially dynamics of suicidal behaviour His motivational and emotional analysis of suicide along with case studies are very lucid and enlightening Next he has elaborated the social and sexual adjustment in suicides from his sample of respondents The illustrative case studies incorporate revealing statements by the respondents regarding their motivation and its causes Case discussion at the end is quite convincing The adjustment Inventory prepared by Dr Deshpande is original and very useful in determining the personality characteristics of the suicide attempters as compared with normal people His observation on each of these characteristics and the final conclusion based on the results are impartial factual and reliable He has given the historical aspects of the attitudes of authorities and government from ancient Indian setting to modern Indian conditions He has made exhaustive comments on the laws in British India and in Republic of India after giving details of the trial cases He has further written on

the history of thoughts on euthanasia and their modification in modern times His final and sincere request for legislation on euthanasia and assisted suicide in exceptional cases is quite appealing and deserves government's prompt consideration The prevention aspects of suicidal potential along with detailed description of various scales inventories and questionnaires to measure and assess suicidal intent follows next The utility of these psychometric methods to identify and assess suicidal potential as well as to take preventive measures is well established Crisis intervention through emergency telephone contacts by suicide planners has been advocated Finally he has outlined the management of suicide attempts through various modes of psychotherapy Postvention is congenitally justified to protect the close relatives of suicide victims from the aftermath as well as to prevent such attempts by others who may take the suicidal act as a model This monograph is not only very enlightening but also thought provoking I have personally been bemused and saddened by suicides by my patients which were very often unexpected Such experiences by most of the clinical psychiatrists and psychiatric social workers as well as practising psychologists warrant a specific and special study of the factors that influence a patient's decision to commit suicide West's theory of frustration aggression model to explain murder cum suicide was amply proved and illustrated by the following tragic end of a doctor couple and their sons A busy family physician had to shift his lucrative practice from a smaller city to Pune where better educational facilities were available His elder son was not doing well in a medical college in Bombay for which he had taken my advice and his regular treatment was considered necessary He later showed positive signs and symptoms of schizophrenic disorder Treatment over a period of 2 years did not help He kept avoiding classes and failing This caused Depressive Reactions in his mother who could not adjust to the change of place and practice and anxiety regarding her son Her second son also showed negative symptoms of schizophrenia and poor response to treatment His father who was already struggling in his practice and worried all the time about the mental health of his three dependents became dejected and angry He became desperate when he found no way out this predicament and made an elaborate murder cum suicide pact with his wife who could not resist him He gave intravenous anaesthesia to both of his sons under the garb of treatment and killed them He confirmed their death by thrusting very long screwdriver into their abdomens and hanged himself along with his wife In another shocking case a young widow was severely depressed for over one year after the accidental death of her husband She took no treatment and eventually influenced the thinking of her parents and younger unmarried sister in a Folie a quatre Madmen should by four situation They all jumped in a deep well after tying their legs along with the infant son in the middle of a dark night Her father who was a retired professor active in social service had agreed for this suicide pact along with murder of his grandson His actions shocked the community who had not even suspected such mindless suicidal behaviour from an otherwise very sober and responsible person Such horrifying incidents undermine the confidence of Behaviour Scientists who are committed to prevent suicides Two more illustrative case reports glaringly exposes a helplessness to prevent certain type of suicides A medical student a case of Refractory Endogenous Depression had made

genuine suicidal attempts inspite of intensive treatment He finally succeeded in a suicidal act which he committed abroad where his pilot father had killed himself in a deliberate air crash His act was probably his model A medical post graduate student had not recovered from deep depression in spite of proper antidepressant treatment including Electric shock Treatment As advised his father was watching him all the time but in a moment of lapse the doctor slopped and ran to the Railway station His father ran after him to see his son s head severed from his trunk by arriving train In a recent magazine report a Pranam sect leader influenced his small group of followers to seek Mukti or Moksha by jumping in a steep waterfall near panna in Central India This death would give them direct entry into heaven Six including four from a family died but two others survived because they did not jump out of great fear Some of the inferences one may draw from these case reports are 1 Death is seen as a final extinction or liberation of the soul 2 A gateway to enternal bliss and peace or as a deliverance from life s suffering 3 Retribution for sins often imagined made in life Some of the participants of suicide pacts are convinced about the emptiness and meaninglessness of life In other cases some see death as a triumph over their frailty or suffering Some believe death will lead them to their beloved who have departed earlier as in the case of a medical student whose father had died in an air crash The other explanation was identification with his suicidal father Why do these unfortunate victims become so desparate as to make a suicide cum murder pact snuffing out the life of very young dependents Do the social prejudices and attitudes which frown on such persons for their suicidal attempts contribute to their Death wish Joad s caustic reference to the social attitudes is justifiable as they are still prevalent viz those who succeed in their suicidal acts are lunatic and those who fail are criminals Till recent past the lawmakers had primitive laws for suicidal attempts ignoring their suffering and scoffing as the justifiable reasons for the suicidal attempts As a matter of fact suicidal attempts are cries for help made by suffering persons even though these may be only attention seeking and do not have a suicidal intent If only others in the family as well as neighbours or colleagues were attentive and sympathetic and offered some help or guidance many a suicide could be prevented While differentiating a suicidal attempt from intended suicidal act one must not be carried away by any dictum Sometimes a suicidal attempt may lead to unintended death accidentally So also a truly intended suicidal act may fail One of patients was saved after taking 200 phenobarbime 60 mg tablets which is 4 times a fatal dose She was taken to the hospital promptly by her alert relatives so also the alert and zealous team of doctors fought for her life and saved her in spite of coma which had ensued In such cases one has to be very careful as the act very often is repeated with fatal result Suicidal attempts and gestures are considered to lack any risk to life and hence at times neglected But the indifference by close relations may deject them and drive them to perform a successful suicidal act So all such persons with suicidal behaviour deserve our attention sympathy and expert help Viz psychiatric or psychosocial sympathetic attitude must be the base for any preventive effort to reduce suicide rate

states in the Black Sea Turkey Russia Ukraine Georgia Romania and Bulgaria This book examines the maritime capabilities and assets of each of the six littoral Black Sea states and also considers the implications of the distribution of maritime power on both regional and international security As such it makes an important contribution to the debate about what constitutes maritime power in the twenty first century and provides a thematic comparative study of the ability of each of the littoral states of the Black Sea to project maritime power

Approval Plans Linda S Katz, John H Sandy, 2013-10-18 How can you as an acquisition librarians keep current on the output of hundreds of publishers The answer of course is that you cannot For over 30 years approval plans have been used by librarians to acquire current titles save staff time and build core collections Even today these reasons seem appropriate as libraries try to maintain up to date collections and control personnel and operating budgets However as shown in *Approval Plans Issues and Innovations* the use of approval plans is not so simple and straightforward their use is subject to complex procedures and policies and even politics This book presents research by librarians from academic libraries and professionals from approval vendors to give you necessary insight on the major approval plan issues and to show you some of the innovative approaches to solving the problems associated with approval plans Unfortunately approval plans are not as simple as creating a needs profile and receiving the books that match that profile from an approval vendor Problems and questions invariably arise If you are in acquisitions and collection development or administration it is particularly important that you explore the following questions posed in *Approval Plans* What mechanisms can reduce receipt of duplicate titles Do vendors see small college libraries as a viable market What role does technology play in improving approval plans What level of returns is acceptable Do the hidden operational costs of approval plans offset their benefits *Approval Plans* is full of useful information that will show you how to save time and money improve collections and utilize new technology The book discusses such key issues as the benefits of approval plans to public service vs the costs to technical service the call for refined profiles to help keep return rates low proper management in key areas such as profile development quality control and plan maintenance approval plan overlap and vendor responsibilities Innovations covered include the call for introduction of approval plans to small college libraries the possibility of outsourcing technical service functions with vendor supplied cataloging and end processing the use of online services World Wide Web and the Internet to improve communication between vendors publishers and libraries and a list of criteria to be considered when selecting an automated acquisitions system *Approval Plans* is especially useful and timely as libraries are considering the best ways for acquiring books during an era of declining materials budgets This collection also has special importance in a broader sense to the many changes that are occurring in academic libraries today
