Mysterious Travelers Zack Kruse, 2021-02-01 2022 Honorable Mention Recipient of the Charles Hatfield Book Prize from the Comics Studies Society Steve Ditko 1927 2018 is one of the most important contributors to American comic books As the cocreator of Spider Man and sole creator of Doctor Strange Ditko made an indelible mark on American popular culture

Mysterious Travelers Steve Ditko and the Search for a New Liberal Identity resets the conversation about his heady and powerful work Always inward facing Ditko's narratives employed superhero and supernatural fantasy in the service of self examination and with characters like the Question Mr A and Static Ditko turned ordinary superhero comics into philosophic treatises Many of Ditko's philosophy driven comics show a clear debt to ideas found in Ayn Rand's Objectivism Unfortunately readers often reduce Ditko's work to a mouthpiece for Rand's vision

Mysterious Travelers unsettles this notion In this book Zack Kruse argues that Ditko's philosophy draws on a complicated network of ideas that is best understood as mystic liberalism Although Ditko is not the originator of mystic liberalism his comics provide a unique window into how such an ideology operates in popular media Examining selections of Ditko's output from 1953 to 1986 Kruse demonstrates how Ditko's comics provide insight into a unique strand of American thought that has had a lasting impact

Nguyen Huong,2025-07-22 *GOD OF KILLING CHAPTER 11* The sky was dark there was no sun moon or spirit the spiritual energy of heaven and earth was lacking this was an ancient abandoned wasteland A huge mountain as if it had been cut off from the middle by a giant sword the mountain top was leveled like a mirror the Heavenly Gate emitted a dazzling green light hovering right above the mountain top Shi Yan stood at the top of the mountain looking around discovering that the entire world was covered by a layer of gray clouds his divine sense spread out but was blocked by this layer of gray clouds even a thousand meters around it was difficult to reach Looking into the distance one could see many extremely large pitch black pits unknown how deep they were The river was dry no grass or trees could be seen there was no trace of life this place was like a dead zone giving people an extremely heavy feeling Physics for the Inquiring Mind Eric M. Rogers,2011-04-17 In our scientific age an understanding of physics is part of a liberal education Lawyers bankers governors business heads administrators all wise educated people need a lasting understanding of physics so that they can enjoy those contacts with science and scientists that are part of our civilization both materially and intellectually They need knowledge and understanding instead of the feelings all too common that physics is dark and mysterious and that physicists are a strange people with incomprehensible interests Such a sense of understanding science and scientists can be gained neither from sermons on the beauty of science nor from the rigorous courses that colleges have offered for generations when the headache clears away it leaves little but a confused sense of mystery Nor is the need met by survey courses that offer a smorgasbord of tidbit they give science a bad name as a compendium of information or formulas The non scientist needs a course of study that enables him to learn real science and make its own with delight For lasting benefits the intelligent non scientist needs a course of study that enables him to learn genuine science carefully and then encourages him to think about it and use it He needs a carefully selected framework of topics not so many that learning becomes superficial and hurried not so few that he misses the connected nature of scientific work and thinking He must see how scientific knowledge is built up by building some scientific knowledge of his own by reading and discussing and if possible by doing experiments himself He must think his own way through some scientific arguments He must form his own opinion with guidance concerning the parts played by experiment and theory and he must be shown how to develop a taste for good theory He must see several varieties of scientific method at work And above all he must think about science for himself and enjoy that These are the things that

this book encourages readers to gain by their own study and thinking Physics for the Inquiring Mind is a book for the inquiring mind of students in college and for other readers who want to grow in scientific wisdom who want to know what physics really is Paranormal Nation Marc E. Fitch,2013-03-21 This thought provoking study of paranormal phenomena traces the impact of supernatural beliefs on popular culture and conversely examines the influence of new communication technologies on research being conducted in the field Did you know that interest in UFO research increased during the 1960s as a result of the Kennedy assassination Or that America experienced a Satanic Panic in the 1980s that culminated with the longest most expensive court trial in American history This book reviews the history economy and community of paranormal research in this country and considers the deeper meaning behind the philosophies and theories surrounding the industry Paranormal Nation Why America Needs Ghosts UFOs and Bigfoot explores the events that have defined paranormal belief systems today From the birth of religious doctrine to European witch hunts to the increasing popularity of the supernatural in American television programming the author examines the past and present conditions that have fueled interest in the unexplained and considers what this trend means for modern day America Quinta Essentia - Part 1 (2nd Ed.) segregation sparked wide reaching social change as social cultural spatial and racial boundaries were transgressed and transformed This book investigates how Afrikaners have mediated the country s shifting boundaries within the realm of religion For instance one in every three Afrikaners used these new freedoms to leave the traditional Dutch Reformed Church NGK often for an entirely new religious affiliation within the Pentecostal or Charismatic churches or New Religious Movements such as Wiccan neopaganism Based on long term ethnographic fieldwork in the Western Cape area the book investigates what spiritual life after racial totalitarianism means for the members of the ethnic group that constructed and maintained that very totalitarianism Ultimately the book asks how these new Afrikaner religious practices contribute to social solidarity and integration in a persistently segregated society and what they can tell us about racial relations in the country today This book will be of interest to scholars of religious studies social and cultural anthropology and African studies
