## **Strange Weather Culture Science And Technology In The Age Of Limits:**

**Strange Weather** Andrew Ross, 1991-09-17 Who speaks for science in a technologically dominated society In his latest work of cultural criticism Andrew Ross contends that this question yields no simple or easy answer In our present technoculture a wide variety of people both inside and outside the scientific community have become increasingly vocal in exercising their right to speak about on behalf of and often against science and technology Arguing that science can only ever be understood as a social artifact *Strange Weather* is a manifesto which calls on cultural critics to abandon their technophobia and contribute to the debates which shape our future Each chapter focuses on an idea a practice or community that has established an influential presence in our culture New Age computer hacking cyberpunk futurology and global warming In a book brimming over with intelligence both human and electronic Ross examines the state of scientific countercultures in an age when the development of advanced information technologies coexists uneasily with ecological warnings about the perils of unchecked growth Intended as a contribution to a green cultural criticism *Strange Weather* is a provocative investigation of the ways in which science is shaping the popular imagination of today and delimiting the possibilities of tomorrow

**Cultural Studies 10.3** Lawrence Grossberg, Della Pollock, 1996 *Cinematic Encounters with Disaster* Simon R. Troon, 2024-06-13 *Cinematic Encounters with Disaster* takes Hollywood's disaster movies and their codified versions of natural disaster post apocalyptic survival and extra terrestrial threat as the starting point for an analytical trajectory that works toward new understandings of how cinema shapes and informs our conceptions of disaster and catastrophe It examines a range of films from distinct regional and industrial contexts Hollywood indie movies different kinds of documentaries from the US and elsewhere and auteurist realist cinema from Europe and Asia Moving across and beyond critical and industrial categories that often inform thinking about cinema this book contends that different approaches to film style can push us to imagine disaster in distinct ways with distinct ethical connotations Framed by contemporary concerns around the global climate crisis and the advent of the Anthropocene questions about how films can best offer responses to historical exigency guide the book's explorations of spectacular 2010s blockbusters like *Gravity* 2013 and *San Andreas* 2015 environmental documentaries including the paradigmatic *An Inconvenient Truth* 2006 post disaster films by auteurs including Abbas Kiarostami and Lav Diaz and more Conceiving of disaster as intersubjective ethics between humans and nonhuman alterity forces of nature errant technology monsters ghosts and other entities it analyses how formal techniques and narrative strategies render encounters in which human protagonists are confronted with the threat of death and respond in ways that can be instructive for our planet's present juncture

**Going Native** Shari M. Huhndorf, 2015-01-26

Since the 1800 s many European Americans have relied on Native Americans as models for their own national racial and gender identities Displays of this impulse include world s fairs fraternal organizations and films such as *Dances with Wolves* Shari M Huhndorf uses cultural artifacts such as these to examine the phenomenon of going native showing its complex relations to social crises in the broader American society including those posed by the rise of industrial capitalism the completion of the military conquest of Native America and feminist and civil rights activism Huhndorf looks at several modern cultural manifestations of the desire of European Americans to emulate Native Americans Some are quite pervasive as is clear from the continuing if controversial existence of fraternal organizations for young and old which rely upon Indian costumes and rituals Another fascinating example is the process by which Arctic travelers went Eskimo as Huhndorf describes in her readings of Robert Flaherty s travel narrative *My Eskimo Friends* and his documentary film *Nanook of the North* Huhndorf asserts that European Americans appropriation of Native identities is not a thing of the past and she takes a skeptical look at the tribes beloved of New Age devotees *Going Native* shows how even seemingly harmless images of Native Americans can articulate and reinforce a range of power relations including slavery patriarchy and the continued oppression of Native Americans Huhndorf reconsiders the cultural importance and political implications of the history of the impersonation of Indian identity in light of continuing debates over race gender and colonialism in American culture

*Meanings of Endurance* Noel Salazar, Jeroen Scheerder, 2022-12-09 This book critically analyses the concept of endurance from different theoretical conceptual methodological and empirical perspectives The first part of the book takes a closer look at endurance by examining how it relates to concepts such as resilience perseverance and perdurance By analysing how these concepts overlap but differ we reach a better understanding of what constitutes endurance Furthermore endurance is reconfigured as a as a mundane aspect of everyday life The latter part of the book focuses on embodied experiences of endurance more specifically on endurance running walking and physical performances The different contributions focus on the meanings values and attributes that people ascribe to endurance in various socio cultural contexts The book uncovers practices environments and discourses in which endurance is applied and manifested from drought affected communities in rural Australia to professional endurance runners in Ethiopia as well as migrants in Greece and performance acts in domestic

spaces in the United Kingdom and beyond This book will be of interest to scholars of movement sciences sports studies mobilities leisure studies and resilience studies      **Sustainability: Sustainability indicators** Michael Redclift,2005 Introducing the reader to sustainability as a concept a contested idea and a political goal this book brings together a range of articles and published papers that have influenced the course of thinking in social science It examines the links between the natural and social sciences as well as the public policies      **Follow for Now** Roy Christopher,2007 Book Description Follow for Now Interviews with Friends and Heroes is an anthology of forty three interviews with minds of all kinds Spanning over seven years Follow for Now includes interviews with such luminaries as Bruce Sterling Douglas Rushkoff DJ Spooky Philip K Dick Aesop Rock Erik Davis Howard Bloom David X Cohen Richard Saul Wurman N Katherine Hayles Manuel De Landa Rudy Rucker Milemarker Steve Aylett Doug Stanhope Paul Roberts Shepard Fairey Tod Swank dalek Eric Zimmerman Steven Johnson Mark Dery Geert Lovink Brenda Laurel and many many more Follow for Now is an eclectic independently minded snapshot of the intellectual landscape at the beginning of the twenty first century It also includes an extensive bibliography a full index and weighs in at nearly 400 pages      Extreme Weather and Global Media Julia Leyda,Diane Negra,2015-06-05 In the two decades bracketing the turn of the millennium large scale weather disasters have been inevitably constructed as media events As such they challenge the meaning of concepts such as identity and citizenship for both locally affected populations and widespread spectator communities This timely collection pinpoints the features of an often overlooked yet rapidly expanding category of global media and analyzes both its forms and functions Specifically contributors argue that the intense promotion and consumption of extreme weather events takes up the slack for the public conversations society is not having about the environment and the feeling of powerlessness that accompanies the realization that anthropogenic climate change has now reached a point of no return Incorporating a range of case studies of extreme weather mediation in India the UK Germany Sweden the US and Japan and exploring recent and ongoing disasters such as Superstorm Sandy the Fukushima nuclear crisis flooding in Germany and heat waves in the UK Extreme Weather and Global Media generates valuable inquiry into the representational and social characteristics of the new culture of extreme weather      **Harbingers of Global Change** Roli Varma,2006-01-01 Harbingers of Global Change enriches a revealing case study of a little understood group of immigrants with the contemplation of broader social dynamics including assimilation acculturation and the persistence of racial and ethnic prejudice Varma offers more than a much needed addition to the emergent literature on the plight of international immigration professionals Harbingers provides a visionary look at where global society is headed in the twenty first century an epoch in which all human beings may become foreigners in the virtual techno marketplace      *In Search of New Age Spiritualities* Adam Possamai,2019-01-22 The search for an adequate understanding of the New Age phenomenon is fraught with difficulties when examined within the perspectives of sociology of religion which have shed light on religion in modernity New Agers cannot be located easily in the secularisation narrative they move through fluid networks

rather than settled collectivities they assemble personal syncretisms of belief myth and practice rather than subscribe to codified doctrines and prescribed rituals New Age is quickly found to be a label that is unacceptable to many of those designated as New Agers This book advances our understanding of the so called New Age phenomenon by analysing accounts of insiders religious experience and orientations This approach is brought to bear not only on the study of written documents relating to New Age and its putative antecedents but on the analysis of in depth interviews with thirty five spiritual actors

**American Idyll** Catherine Liu, 2011-09-21 A trenchant critique of failure and opportunism across the political spectrum American Idyll argues that social mobility once a revered hallmark of American society has ebbed as higher education has become a mechanistic process for efficient sorting that has more to do with class formation than anything else Academic freedom and aesthetic education are reserved for high scoring privileged students and vocational education is the only option for economically marginal ones Throughout most of American history antielitist sentiment was reserved for attacks against an entrenched aristocracy or rapacious plutocracy but it has now become a revolt against meritocracy itself directed against what insurgents see as a ruling class of credentialed elites with degrees from exclusive academic institutions Catherine Liu reveals that within the academy and stemming from the relatively new discipline of cultural studies animosity against expertise has animated much of the Left's cultural criticism By unpacking the disciplinary formation and academic ambitions of American cultural studies Liu uncovers the genealogy of the current antielitism placing the populism that dominates headlines within a broad historical context In the process she emphasizes the relevance of the historical origins of populist revolt against finance capital and its political influence American Idyll reveals the unlikely alliance between American pragmatism and proponents of the Frankfurt School and

argues for the importance of broad frames of historical thinking in encouraging robust academic debate within democratic institutions In a bold thought experiment that revives and defends Richard Hofstadter's theories of anti intellectualism in American life Liu asks What if cultural populism had been the consensus politics of the past three decades American Idyll shows that recent antielitism does nothing to redress the source of its discontent namely growing economic inequality and diminishing social mobility Instead pseudopopulist rage in conservative and countercultural forms alike has been transformed into resentment content merely to take down allegedly elitist cultural forms without questioning the real political and economic consolidation of powers that has taken place in America during the past thirty years *Music and Technoculture* René T. A. Lysloff, Leslie C. Gay, Jr., 2013-08-15 Moving from web to field from Victorian parlor to 21st century mall the 15 essays gathered here yield new insights regarding the intersection of local culture musical creativity and technological possibilities Inspired by the concept of technoculture the authors locate technology squarely in the middle of expressive culture they are concerned with how technology culturally informs and infuses aspects of everyday life and musical experience and they argue that this merger does not necessarily result in a cultural grayout but instead often produces exciting new possibilities In this collection we find evidence of musical practices and ways of knowing music that are informed or even significantly transformed by new technologies yet remain profoundly local in style and meaning CONTRIBUTORS Leslie C Gay Jr Kai Fikentscher Tong Soon Lee Ren T A Lysloff Matthew Malsky Charity Marsh Marc Perlman Thomas Porcello Andrew Ross David Sanjek Jonathan Sterne Janet L Sturman Timothy D Taylor Paul Th berge Melissa West Deborah Wong Ebook Edition Note Four of the 26 illustrations and the cover illustration have been redacted

**The Cause** Eric Alterman, 2013-05-28 A major history of American liberalism and the key personalities behind the movement Why is it that nearly every liberal initiative since the end of the New Deal whether busing urban development affirmative action welfare gun control or Roe v Wade has fallen victim to its grand aspirations often exacerbating the very problem it seeks to solve In this groundbreaking work the first full treatment of modern liberalism in the United States bestselling journalist and historian Eric Alterman together with Kevin Mattson present a comprehensive history of this proud yet frequently maligned tradition In *The Cause* we meet the politicians preachers intellectuals artists and activists from Eleanor Roosevelt to Barack Obama Adlai Stevenson to Hubert Humphrey and Billie Holiday to Bruce Springsteen who have battled for the heart and soul of the nation *Old and New Media after Katrina* Diane Negra, 2016-02-10 Ten years after Hurricane Katrina this thoughtful collection of essays reflects on the relationship between the disaster and a range of media forms The assessments here reveal how mainstream and independent media have responded sometimes innovatively sometimes conservatively to the political and social ruptures Katrina has come to represent The contributors explore how Hurricane Katrina is positioned at the intersection of numerous early twenty first century crisis narratives centralizing uncertainties about race class region government and public safety Looking closely at the organization of public memory of

Katrina this collection provides a timely and intellectually fruitful assessment of the complex ways in which media forms and national events are hopelessly entangled      Science Wars Andrew Ross,1996 Analyzing the antidemocratic tendencies within science and its institutions they insist on a more accountable relationship between scientists and the communities and environments affected by their research      **Representations of the Post/human** Elaine L. Graham,2002 This work draws together a wide range of literature on contemporary technologies and their ethical implications It focuses on advances in medical reproductive genetic and information technologies      **Political Ecology** David Bell,Leesa Fawcett,Roger Keil,Peter Penz,2005-08-18 This collection addresses environmental issues from a contemporary political economy perspective The papers explore issues such as the link between culture and nature the impact of humanity on the environment technology s role and communications      **Liminal Lives** Susan Merrill Squier,2004-12-07 A study of the mutually constitutive relations between Western biomedicine and Anglo American literature in the 20th and early 21st centuries tracing the interwoven processes by which both fields have transformed the course of human life
