Strange Behavior:

Strange Behavior Harold L. Klawans, 2001 A master neurologist's clinical tales both funny and profound of the evolution of the brain No matter what the ailment painful foot syndrome or mad cow disease Dr Klawans ultimately treated or

diagnosed people's brains Here are his deductions from years of study **Normal and Abnormal Behavior in Chinese Culture** A. Kleinman, T.Y. Lin, 1980-12-31 Our purpose in assembling the papers in this collection is to introduce readers to studies of normal and abnormal behavior in Chinese culture We want to offer a sense of what psychiatrists and social scientists are doing to advance our understanding of this subject including what findings are being made what questions researched what conundrums worried over Since our fund of knowledge is obviously incomplete we want our readers to be aware of the limits to what we know and to our acquisition of new knowledge Although the subject is too vast and uncharted to support a comprehensive synthesis in a few areas e.g. psychiatric epidemiology enough is known for us to be able to present major reviews The chapters themselves cover a variety of themes that we regard as both intrinsically interesting and deserving of more systematic evaluation Many of the issues they address we believe to be valid concerns for comparative cross cultural studies No attempt is made to artificially integrate these chapters since the editors wish to highlight their distinctive interpretive frameworks as evidence of the rich variety of approaches that scholars take to this subject We see this volume as a modest and self consciously limited exploration Here are some accounts and interpretations but by no means all of normal and abnormal behavior in the context of Chinese culture that we believe fashion a more discriminating understanding of at least a few important aspects of that subject Human Motivation David Clarence McClelland, 1987

Human Motivation examines the methods behind four major human motive systems achievement power affiliation and avoidance **Hearts of Darkness** John Liebert, William J. Birnes, 2014-05-06 From Sandy Hook Connecticut to Aurora Colorado to Tucson Arizona this nation has been racked from coast to coast with mass shootings perpetrated by criminals with sick minds Authors Dr Liebert and Dr Birnes believe the increase in violence is an epidemic and dig deep into the causes of mental illness to determine what exactly is going on with these individuals and society as a whole and what action can be taken to slow this frightening trend toward mass violence Dr Liebert and Dr Birnes believe that many mass suicides are predictable and preventable Dr Liebert uses his extensive experience in psychopathology and criminal psychology to describe how clinicians can identify the behaviors of potential suicidal mass killers and possibly prevent their crimes if they read the warning signs when legal opportunities present themselves such as when recurrent domestic violence or psychotic communications are reported to authorities The authors also discuss the influence of media particularly violent video games and how the evolution of American culture affects suicidal mental illness With startling statistics fascinating case studies and practical no nonsense solutions the authors present a groundbreaking and compelling treatise on violence in America □□□

□□ , 1999 *First Responder's Guide to Abnormal Psychology* William I. Dorfman, Lenore E. Walker, 2007-12-27 This book

gives readers critical insights into the human impact of extreme trauma and the various levels of mental impairment suffered by both victims and survivors. Renowned trauma experts William Dorfman and Lenore Walker give this book immediate relevance through the use of real life examples from a wide range of crisis situations. They have also deliberately minimized research citations within the text for greater readability.

College Students in Distress Bruce Sharkin, 2013-04-15. Be prepared to deal with campus situations that involve students in emotional crisis. *College Students in Distress* provides college personnel with invaluable information on how to identify and refer emotionally troubled students for professional counseling. Dr. Bruce S. Sharkin, a staff psychologist at Kutztown University in Pennsylvania, addresses general warning signs of student distress, symptoms of specific psychological problems such as anxiety and depression, guidelines for interventions and methods of making a referral for counseling. The book also examines current mental health issues for college students and provides an overview of common campus policies and procedures such as psychological emergencies, withdrawal and readmission, and mandatory counseling. *College Students in Distress* provides the answers you need to manage difficult and potentially dangerous situations on campus. Case examples based on real life experiences give you a clear sense of what can happen when responding to students in emotional distress, particularly when dealing with specific issues and student populations, and will help in your efforts to review and/or revise the current practices of your school. This unique book is essential as a resource and referral guide that raises awareness of this growing national problem without being limited to the characteristics of a particular college or university. Topics examined in *College Students in Distress* include the impact of mental health problems on academics, the roles and functions of college counseling services, indicators of emotional disturbance, suicidal behavior, self-inflicted harm, eating disorders, guidelines for intervention, accommodations for students with psychological disabilities, and much more. *College Students in Distress* is a must read for faculty and staff members, particularly those working in residential life, student health, and public safety, and for administrative offices within student services and student affairs.

Social Change, Stress and Mental Health in the Pearl of the Alps G. Guntern, 2012-12-06. I first became acquainted with Dr. Gottlieb Guntern's work at several scientific symposia and was impressed by the way he combined originality and imagination with the proper use of careful multidisciplinary epidemiologic approaches. Dr. Guntern has attacked some of the cardinal aspects of the consequences in terms of health, well-being, and social function of rapid social change in an originally isolated rural community, a phenomenon that is occurring at an accelerating rate in developing as well as in developed countries. This worldwide problem is approached by Dr. Guntern in a holistic manner. Health and social function are seen as integrated elements of human existence and are studied accordingly. His analysis of social events and their consequences for health and well-being in a small Alpine village can serve as a paradigm for the study of the process of social change and its various consequences elsewhere. In view of the problem's importance and being impressed by the thoroughness and ingenuity of Dr. Guntern's multifaceted approach, I encouraged him to make the study available to an

international readership Dr Guntern's book is warmly recommended not only to epidemiologists sociologists anthropologists and psychiatrists but also to all those interested in psychosocial and psychosocially induced problems in today's and tomorrow's environments Lennard Levi M D Fundamentals of Abnormal Psychology Ronald J.
