Strangers In High Places

Robert R. Redfield

Strangers In High Places:

Strangers in High Places Michael Frome, 1966 Comprises the history conservation efforts and portraits of those who brought into being the Great Smoky Mountains National Park Camping section added **Beyond the Mountains** Drew A. Swanson, 2018 Beyond the Mountains explores the ways in which Appalachia often served as a laboratory for the exploration and practice of American conceptions of nature The region operated alternately as frontier wilderness rural hinterland region of subsistence agriculture bastion of yeoman farmers and place to experiment with modernization In these various takes on the southern mountains scattered across time and space both mountain residents and outsiders consistently believed that the region's environment made Appalachia distinctive for better or worse With chapters dedicated to microhistories focused on particular commodities Drew A Swanson builds upon recent Appalachian studies scholarship emphasizing the diversity of a region so long considered a homogenous backwater While Appalachia has a recognizable and real coherence rooted in folkways agriculture and politics among other things it is also a region of varied environments people and histories These discrete stories are however linked through the power of conceptualizing nature and work together to reveal the ways in which ideas and uses of nature often created a sense of identity in Appalachia Delving into the environmental history of the region reveals that Appalachian environments rather than separating the mountains from the broader world often served to connect the region to outside places *Transforming the Appalachian Countryside* Ronald L. Lewis, 2000-11-09 In 1880 ancient growth forest still covered two thirds of West Virginia but by the 1920s lumbermen had denuded the entire region Ronald Lewis explores the transformation in these mountain counties precipitated by deforestation As the only state that lies entirely within the Appalachian region West Virginia provides an ideal site for studying the broader social impact of deforestation in Appalachia the South and the eastern United States Most of West Virginia was still dominated by a backcountry economy when the industrial transition began In short order however railroads linked remote mountain settlements directly to national markets hauling away forest products and returning with manufactured goods and modern ideas Workers from the countryside and abroad swelled new mill towns and merchants ventured into the mountains to fulfill the needs of the growing population To protect their massive investments capitalists increasingly extended control over the state's legal and political systems Eventually though even ardent supporters of industrialization had reason to contemplate the consequences of unregulated exploitation Once the timber was gone the mills closed and the railroads pulled up their tracks leaving behind an environmental disaster and a new class of marginalized rural poor to confront the worst depression in American history **Great Smoky Mountains National Park** United States. National Park Service, 2016 *New South Indians* Christopher Arris Oakley, 2024-01-12 The Eastern Band's economic decisions of the 1900s did not occur in a vacuum In fact these decisions reflected regional changes and the broader development of the post Civil War American South The Eastern Band of Cherokee Indians formally incorporated under North Carolina law in the 1880s and their economic policies

evolved as the country experienced Jim Crow segregation the Great Depression World War II and the civil rights movement During the twentieth century members of the Eastern Band embraced an economic strategy partially based on tourism In the late 1900s they pursued policies that facilitated the rise of casino gaming Divided into five chapters Christopher Arris Oakley s New South Indians traces the economic development of the Eastern Band throughout the twentieth century to better contextualize the Cherokee Tribal Council s 1990s decision to incorporate gaming into the nation s economic strategy In building his contextual framework Oakley discusses the interdependent relationships forged by Cherokee Tribal Council members with various public and private entities in order to protect their land manage their resources and advance the well being of their nation s economy and community New South Indians also situates the story within the history of the American South Thus the saga of the Eastern Band s struggle for economic autonomy and financial stability throughout the stormy twentieth century can be seen as an integral part of the historical account of western North Carolina A multifaceted glimpse into a vital aspect of contemporary southern history New South Indians is sure to appeal to a wide variety of readers from those captivated by Native American culture and the history of the modern South to those interested in economic history

George BARTLETT (of Trowbridge.),1857 *All We Knew Was to Farm* Melissa Walker,2002-07-22 Winner of the Willie Lee Rose Prize from the Southern Association for Women Historians In the years after World War I Southern farm women found their world changing A postwar plunge in farm prices stretched into a twenty year agricultural depression and New Deal programs eventually transformed the economy Many families left their land to make way for larger commercial farms New industries and the intervention of big government in once insular communities marked a turning point in the struggle of upcountry women forcing new choices and the redefinition of traditional ways of life Melissa Walker s *All We Knew Was to Farm* draws on interviews archives and family and government records to reconstruct the conflict between rural women and bewildering and unsettling change Some women adapted by becoming partners in farm operations adopting the roles of consumers and homemakers taking off farm jobs or leaving the land The material lives of rural upcountry women improved dramatically by midcentury yet in becoming middle class Walker concludes the women found their experiences both broadened and circumscribed Selected and elected T.
